PREFACE

The *Pinadipa-Sūtra* ascribed to Piṅga, the great grammarian of ancient India, is known as the *Śikṣa-Vedāṅga*. It was eighty years ago that Weber published a critical edition of this work in his *Indische Studien* (IV). This edition has long been out of print and besides this later researches and corrections in new materials have made it necessary that the work should be edited afresh. Hence the present edition has been prepared. The importance of this work has been discussed in the Introduction. But one aspect of the critical study of the text of the *Pinadipa-Sūtra* which has not been noticed there is that from such a study we can more or less clearly understand how literary documents of ancient India like the present text have in course of their transmission to the posterity added to their bulk through interpolation in successive periods. Eighteen couplets in which the original *Pinadipa-Sūtra* was in all probability composed had added to them in the present day text no less than forty-two couplets. The first path as on our guard against taking every syllable of an ancient work as of equal antiquity and we are inclined to turn our attention to higher editions which has been attempted in this volume. The present editor however does not claim infallibility for himself and will consider himself to be simply paid for his labours if scholars will give him the credit for so honest attempt in pursuance of a well-known principle.

For various reasons the printing of this volume took nearly three years during which some amount of work related to the subject has been done. I have tried as far as has been possible for me to utilize or utilize each work in the list of addresse. If however any important writing in this line has escaped my notice I should apologise to its author.

My best thanks are due to the authorities of the Columbia University for giving me every facility in the work and to my esteemed friend Pandit Anandramdas Tarkatītha of the Sri MSS. Department, Columbia University, for kindly helping me in reading the proof of the text portion, and also to the authorities of the India Office, the State Library of Berlin, of Munich, the University of Leod for lending MSS or supplying photographic copy of them. It is with great pleasure that I should mention here that the photograph of the *Śānti-pāṭha* supplied by the University of Leod came as a gift to the Columbia University. And finally I should offer my most grateful thanks to my teacher Prof. Dr. Sanku Kumar Chakravarty for his kindly making valuable suggestions which he went through the volume in MS. as well as in print. It however goes without saying that for all views expressed in the work the responsibility remains entirely mine.

SYMBOLS and ABBREVIATIONS, etc.

Thick type (Devanagari) in pp. 34, 35-44 and asterisks in pp. 7-24 and Arabic numerals on the left of all these pages will indicate the position of the reconstructed text in different recensions.

An asterisk will indicate a spurious passage. When put before the first hemistich the asterisk relates to the entire couplet and it sometimes relates to an entire couplet together with a third hemistich. An Arabic numeral appearing on the left margin between a pair of double slashes (e.g., 1134) signifies the position of the passage in the reconstructed text. A number prefixed to hemistich relates to it and the hemistich which precedes it; numbers with 'a' and 'b' after them indicate respectively the first and the second hemistich only of a couplet in the reconstructed text.

Single types in the Transliterations have been for the transcription and translation of passages of the P⁵, which have been considered original, and in Notes on them also such types have been used.

INTRODUCTION

I

1. *The Present Edition* Among the large number of words known as the *Sūtras*¹ the Indian tradition² assigns the revision of the *Yajñika Sūtra* to the one connected with the name of Pīṅga (see § 28). Weber in his edition of the *Pīṅga Sūtra* (*Indische Studien*, IV) has however remained silent on this point. In his *History of Sanskrit Literature* too he did not give any definite opinion in the matter, but later on Max Müller positively denied the validity of the traditional notice about the Pī. being a *Yajñika*.³ Since the days of Max Müller his view has been accepted by almost all the scholars without the slightest protest. Prof. Lachar may be said to have been a notable exception in this matter⁴; for he maintains that the Pī. though late in its present form, is old in its contents. This view however has met with very scanty attention from scholars who are otherwise very careful. Even two very careful writers who touched the subject, Mr. C. V. Vaidya and Dr. Siddheshvara Varma, have followed the view of Max Müller. Of these two the opinion of Mr. Vaidya deserves special mention because he is friendly against what he considers to be a late date (A. I. 30 B. C.) for the *Āyatsa* suggested by Max Müller, and is for

3624, 3625, 3626, 3627, 3628, 3629, 3630, 3631, 3632, 3633, 3634, 3635, 3636, 3637, 3638, 3639, 3640, 3641, 3642, 3643, 3644, 3645, 3646, 3647, 3648, 3649, 3650, 3651, 3652, 3653, 3654, 3655, 3656, 3657, 3658, 3659, 3660, 3661, 3662, 3663, 3664, 3665, 3666, 3667, 3668, 3669, 3670, 3671, 3672, 3673, 3674, 3675, 3676, 3677, 3678, 3679, 3680, 3681, 3682, 3683, 3684, 3685, 3686, 3687, 3688, 3689, 3690, 3691, 3692, 3693, 3694, 3695, 3696, 3697, 3698, 3699, 3700, 3701, 3702, 3703, 3704, 3705, 3706, 3707, 3708, 3709, 3710, 3711, 3712, 3713, 3714, 3715, 3716, 3717, 3718, 3719, 3720, 3721, 3722, 3723, 3724, 3725, 3726, 3727, 3728, 3729, 3730, 3731, 3732, 3733, 3734, 3735, 3736, 3737, 3738, 3739, 3740, 3741, 3742, 3743, 3744, 3745, 3746, 3747, 3748, 3749, 3750, 3751, 3752, 3753, 3754, 3755, 3756, 3757, 3758, 3759, 3760, 3761, 3762, 3763, 3764, 3765, 3766, 3767, 3768, 3769, 3770, 3771, 3772, 3773, 3774, 3775, 3776, 3777, 3778, 3779, 3780, 3781, 3782, 3783, 3784, 3785, 3786, 3787, 3788, 3789, 3790, 3791, 3792, 3793, 3794, 3795, 3796, 3797, 3798, 3799, 3800, 3801, 3802, 3803, 3804, 3805, 3806, 3807, 3808, 3809, 3810, 3811, 3812, 3813, 3814, 3815, 3816, 3817, 3818, 3819, 3820, 3821, 3822, 3823, 3824, 3825, 3826, 3827

plishing this work as early as 1850 B. C.¹ But Mr. Fudge does not make any effort to explain why the P⁸ should not be considered a genuine Vedānga belonging to the great antiquity he assigns to Pāṇini² and Yāgy.³ Dr. Sathishchandra Varma, however, gives some arguments to prove the lateness of the P⁸. But these, as we shall see later on (§§ 20-22) do not seem to be based on all available materials which might have given him a different view about the age and character of the work.⁴ For he has known the P⁸ in three recensions only, while the work itself exists in so late that what may be called four recensions which read together critically are to give one a better idea about the age and character of the text. There is yet another scholar who not only considers the P⁸ to be a late work and hence not a Vedānga, but accords the same position to a Śāstra work marked, on very questionable grounds to Pāṇini.⁵ We shall see later on (§§ 31-33) why this view is untenable, and this will bring us face to face with the text-history of the P⁸ for which a critical edition of the work is essentially necessary. Hence no apology need be offered for undertaking such an edition of the work together with that of the two commentaries attached to its two (old) recensions. Reasons which have led us to believe that the P⁸ is the original Vedānga Śikṣā will be discussed later on (§§ 26-30) and as such it is to be placed as early as Pāṇini who in all likelihood was its author (see § 33). This being the oldest treatise on the phonetics of Old Indo-Aryan—and possibly of Indo-European—language to be studied carefully for the history of the Vedic as well as Sanskrit sounds.

¹ History of Sanskrit Literature, Poona, 1907, Vol. I, Section 2, pp. 15-16.

² *Op. cit.*, loc. cit., p. 4.

³ *Ibid.*, pp. 1-2.

⁴ The same arguments which Dr. Sathishchandra Varma, attempts to show that the P⁸ is not an old Vedānga śikṣā, are as follows: (1) The P⁸ has no claim to be a contemporary to either of the *Śākhāśikṣā* (2) *Śikṣā*, and the *Pāṇini*, while, neither of the P⁸. The first argument has been refuted in §§ 20-22, and the second in § 33.

⁵ Dr. Jagjit Singh, *History of the Sanskrit Literature of Punjab in the Middle Ages*, pp. 272-3.

1. *The Official Apparatus.* It has been mentioned above (§2) that the PS. is available in five versions. Each of these versions again is available in MSS. or printed texts with more or less varying markings. Hence before reconstructing the PS. on the basis of different versions we shall have to find out the most representative text of each version and its age and special characteristics. For this purpose we have consulted various MSS. and printed texts and are giving below the results together with a description of them all.

(a) *The Apocryphal Apparatus.* The Apoc. Apparatus contains the shortest available text of the PS., which consists of 30½ couplets only. Among these AP. 13-16, 17-21a correspond to PS. 1-3a, 18, 22-24, 25-28a, 29a, 30a, 31, 32 (see below the text of the AP. apparatus). The AP. apparatus contains one complete couplet (14) and halves of four others (7b, 19b, and 22b-24b) which the PS. in all likelihood contained. Grounds for such an assumption will be discussed below in the Notes (22b, 14, 19 and 20). AP. 1a, 11-15, which are late additions to the PS. will also be discussed in the Notes (2, 16, 25a, 26a and 30a). Besides these twenty couplets and a half the AP. apparatus includes the following which may justify us in viewing the existence of the AP. 22-24.

rangat e the arop paktak bekham paktak paktak
 maktakak maktakak 'maktak' 'maktak' ara mkt

In this couplet we meet with the AP. 22 (included in the above quotation) and the two fragments of the second half of the same (put within the inverted squares). The reading 'maktak maktak' agrees (the couplet in the copy) recorded by some MSS. seems to rule out the possibility of a palist manuscript error, etc. (Taj. 6), ever occurring in the place of the AP. 22-24. This substitution seems to be the work of some late scribe who under the influence of the Taj. version supplied the reading 'rangat e, etc.', to the erroneously repeated AP. 22-24. Unfortunately without any advantage. From a consideration of the possible

the P₄ with the P₁ recension it appears that the latter is an inflated version of the former. There are no sufficient data to suggest any precise date for the P₄ recension. But it appears by no means recent. For the P₄ quotes from one of the old authorities named Andarip of whose exact time we have no information, but as he is mentioned by the *Mir. 8*,¹ a work, except for its interpolated passages, as so old as 800 B.C., he was probably older than this time. He has also been mentioned in the *Bi-lāma Vyākaraṇa* (Somarasa Tāṭparyā)² and in the *Śānti-pratīka*,³ another commentary to the P₄. There being no mention of Andarip in phonetical works which are palpably very late we may assume that at their time his work was lost and the author of the P₄ quoted possibly earlier than a time when A's work was still available, and such was the case with the authors of the available *Bi-lāma Vyākaraṇa* and the *Śānti-pratīka*.⁴ Now the time for the *Śānti-pratīka* being placed tentatively between 1000 A. C. and 1200 A. C. we may consider the lower limit to the date of the P₄ recension as the 1000 A. C. Along with this should be considered the fact that the *Agro Pariplo* recension can be placed at the earliest in 600 A. C. Thus it appears that the P₄ recension existed between 600 and 1000 A. C. The representative text of this recension of the P₄ has been worked out from the following MS. and printed text:

A¹. Manuscript of the *Śānti-P₄* in the Royal Asiatic Society of Bengal, No. 1634.

A². MS. of the P₄ in the same Society, No. 1168.

A³. MS. of the P₄ in the same Society, No. 4180 C.

B. The photograph of a MS. of the same prepared by the Columbia University from the State Library of Berlin.

¹ See III, II, 1-2.

² See *Pragyanāṣa* (Agro), 1100-11.

³ See III, p. 104. See also the notes at foot of p. 104.

⁴ See also in the *Śānti-pratīka*.

C. The text of the Śānti-Pañjika together with the Pā in its Bā version printed in Benares, 1932 (Haridas Bā Series No. 105 [Mr. Śaṛyabandha Śastry mentions one small text printed in Benares in 1937 (p. viii, introd., p. 32a)]. But we have not seen it. From H. Barta's quotation it seems to agree with BL.]

B. A manuscript of the Śānti-Pañjika from the Royal Library at Munich. This was used by H. Haug.

L. A manuscript of the Śānti-Pañjika from the India Office Library.

U. The autograph of the Śānti-Pañjika presented to the Calcutta University by the University of Lund.

(c) *The Prāṇika Recension.* As was the case with the Pañjika recension this also had to be reconstructed from the position of the passages explained in the commentary called the Śānti-prāṇika. Having had to depend on rather imperfect materials we can never be sure that those retained texts were actually before their respective commentators. The most we can claim for these texts, is that they surely mentioned those particular passages in approximately the same form. But in case of the Pā recension this claim can be admitted only subject to the limitation that the actual order in which some of the couplets occurred is not known. The Pā passages, of the portion of which is the text we are not sure, have been marked with an asterisk in the Table C, showing their relative position. This recension but for the inclusion of one hemistich (Pā 32a) and the exclusion of one couplet (Yā 34) and the different order in which the different passages of the Yā recension have been arranged, is similar to the latter. But the confused manner in which the passages are available in the Yā recension goes to grounds to assume that the texts were reduced to writing from memory at a time later than the composition of the Śānti-prāṇika and hence we have taken it as a separate recension.

The date of the Prāṇika recension may be considered to be later than that of the Pā, for the simple reason that the

former is much longer than the latter and the increase in bulk has needed some time. But the Śhvet Paśukā is not so earlier than the 10th century. For he seems to quote a long passage verbatim from the commentary of Viśvanātha on the *Śhvet Paśupādhyāya* (vide infra). Now this Viśvanātha seems to be a predecessor or at best a contemporary of Uśaka (1104 A.D.). Besides, then, from the introduction to the *Śhvet Paśukā* we learn that the anonymous author wrote a commentary to Pāpaka's metres. Now the only commentary available for the *Uśadakāśikā* of Pāpaka is by Hāḍiyalla¹ who was the minister of the king Lakṣmīnārāyaṇa (c. 1200 A.D.) of Bengal. Hence we may tentatively assign the *Paś.* comment to a time about 1200 A.D. It may be that Madhusūdana Sarasvatī (c. 1500 A.D.), author of the *Pratidhvaṅga-śāstra* described the comment as the *paśu-kāśikā* and it is now he did not name the *Śh.* comment, for that is a *kāśikā-śāstra* (see the text below).

The text of the *Śhvet-paśukā* or the *Paśukā*, however, has been edited from:

(i) The autograph of a MS. from the University of Lund.

Be A version of the *Paśukā* printed in the *Śhvet-saṅgraha* from Dehra.

(c) The *Yajur* Version. The comment of the *PŚ.* has been carefully edited by Weber in his *Indische Studien*, IV, pp. 245 ff., on the basis of two MSS., B and W, of which W is dated Sarvat 1295. Occasional help from three MSS. of the *Śh.* version C, D and L has also been taken in this. For all practical purposes this edition being finished we have adopted it leaving out the minor details. Special observations of this version have already been indicated (§ 2c).

(d) The *Śh.* Version. This version has also been edited by Weber (loc. cit.) on the basis of three MSS., C, D and L. Omitting some minor details we have adopted this edition after comparing it with the following:

¹ Weber places him in the second half of the 15th century. *Ind. Stud.*, VII, p. 154, also *Wissenschaften*, Geschichte 24. 12, p. 10.

Gk. The P⁶ published along with the *Säbst-Pöjflak* from Chavkhanba, Dobruja, 1899.

This recension is scarcely much older than the 15th century; for MSS of this used by Weber are all later than August 1669 and we have come across no earlier MS. This is the most infected version of the P⁶ and contains nearly 80 errors. Only 17½ among these may be taken as genuine. These are Gk 4-11, 13, 16-19, 22-23, 29-40s corresponding to P⁶ 1-6, 9, 11-14, 16a, 18, 19a, 22-23, respectively. The nature and source of the remaining 43 omissions have been discussed below (§ 3).

3. *Reconstruction.* From a very close study of the five recensions eighteen only of the omissions appear to constitute the original P⁶. Only fourteen among these, however, occur in all the recensions,¹ while the remaining omissions do not so occur. But on internal evidence they appear to be organically connected with the fourteen omissions common to all recensions and hence nearly accurate in the original P⁶. Problems connected with them have been discussed in detail in Notes given along with the translation of the P⁶. Sources of more than half of the remaining thirty-two omissions which we consider to be later additions to the text of the P⁶ have been traced to different late *Säbst*² works. Of the remaining twenty omissions the source of which we could not explore, at least eight (Gk 1-3, and 26-28, and passages corresponding to them in other recensions), can probably be ascribed to the editors of different recensions. The remaining twelve were, in all likelihood, taken also from some late *Säbst* text or texts. Groups on which we have considered a passage or group of passages spurious or later additions have also been discussed in Notes. From

¹ Twelve omissions of P⁶ (Gk 1-3) are different recensions given at the end of this translation.

² Several late *Säbst* texts are to some extent to be compared with those of the late *Uspenski* MS. *Wastrow's History of Fed. Lit.*, III, 1, p. 166. In order to give authenticity to these new literary or pseudo-literary texts, no. 1616, phrases have called early verbal texts. These late texts are sometimes important for the study of Fedotopov phonetics.

a study of the interpolated passages it appears that the conclusions of the Vedanga Siksa have at different times made desperate efforts to preserve this small section consisting of only eighteen couplets, from extinction. Last it should fall out of use before later works on the subject, which for the time being give better guidance to the reader of the Vedic texts they called some new materials from them and tacked them on to the P¹ in different ways. Even this method though resorted to sometimes was not exclusively followed. To supplement that they put it along with other works on similarly important subjects in the body of a big compilation like the Agni Purāṇa. A case which seems to be analogous to that is the alleged interpolation of the Śingared-Śra in the corpus of the Mahābhārata. For a tabular statement of the growth¹ of P¹ showing the distribution of genuine and interpolated passages in its different recensions,² see Table A.

Table A

Recensions.	Total Number of Verses etc.	Interpolations.		
		Total	Found	Dismissed.
Agri Purāṇa	24	11	25	1 (1-5 affected)
Pañjikā	20	14	6	24 (1-28 ")
Samhitā	22	22	22	22 (1-22 ")
Śaṅkha Smṛiti ³	11	20	20	22 (1-22 ")
Śa. Śra.	222	22	22	22 (1-22 ")

¹ Compare with the growth of the text of the Vedāṅga (Prof. L. Bhaṅga's *Śikṣā* text pp. 22-23; 3. *Śikṣā*, *Śikṣā*, *Śikṣā*, *Śikṣā*, *Śikṣā*, pp. 22, 23) and of the *Śikṣā* (Prof. Bhaṅga's *Śikṣā*, *Śikṣā*, *Śikṣā*, *Śikṣā*, *Śikṣā*, pp. 22, 23). Report from *Śikṣā*, pp. 22, 23, in *Śikṣā*, 1-22.

² For the meaning of the Śikṣā see below (22-23).

From a study of the above table as well as the contents of the different recesses we can suggest the mutual relations of the different recesses as follows :

THE VEDAS

4. Before taking up the history of growth and development of individual Vedāṅgas it would be proper to enquire into conditions which made it obligatory for the Vedic people to adopt as a part of the sacred law or *śāstra*, the study of which was necessary either for the sustenance, the understanding or the proper sacrificial employment of the Vedic hymns. Materials for such a study are indeed very poor. We have few traces of that early age when the Vedic men were composing songs of praise or attention to their duties with the least idea of their later complicated use in various rituals and ceremonies. Hence, how and when the simple utterances of the early Indo-Aryans who entered India must probably sometime after the beginning of the second millennium B. C.,¹ began to be considered sacred and meant specially to be used in sundry rituals, will probably remain a mystery for all time to come. But it will not be out of place to make here the following a priori considerations.

5. As a great many of the subsequent similarities observable in the Vedic cult (e. g., those in the Brahmanas and the Śāraṅg) have been found to be non-existent among Indo-European people of other countries it may be assumed that a great part of them owe their origin to the influence of some indigenous pre-Vedic cult or cults of India.² In case of the Old Indo-Aryan

¹ cf. Macdonell *op. cit.*, Vol. I, pp. 1007, 1011; 1012-1013; pp. 1017-1018; and Franke-Kam. *Handbuch Ind. I*, 2. Teil, *Ursprung, Sprache und Verbreitung* in the same Part, p. 8. Both authors differ here. But "The History and Philosophy of the Vedas" *op. cit.*, II, 2-3, 1938, p. 7.

² cf. H. Oldenberg, *Origin and Development of the Saṅghe Sampradāya*, pp. 16, 17, also of Barth, *op. cit.*, p. 15.

language a similar pre-Aryan influence has already been postulated to account for the development of cerebral words as well as a portion of the Old Indo-Aryan vocabulary.¹ If such an influence played any considerable part in giving shape to the Vedic religion it may be said to have practically finished a great part of its work about 1600 B. C.² as far as the Indian Midland was concerned; for a very long time must have been necessary for the pre-Aryan Indians to get reconciled with the hostile non-Aryans and ultimately to accept their faith and culture. Now the ethnic composition of the modern Indians who profess adherence to the Vedas shows that a great majority of them has come from non-Aryan stocks. Thus one will probably be justified to assume here a conversion—may be spontaneous—of the non-Aryan people to Vedic religion, which was responsible for such a state of things; and such a conversion in all likelihood began to progress with considerable force about 1600 B. C. when the Vedic people and their ways were in all probability not only no longer displacing but also was becoming attractive to the pre-Aryan people of the land, and a progressive section of them had already been Aryanised as far as their religion was concerned. And even some blood-union with the non-Aryans is much likely to have occurred at this stage. It is quite possible that the six Vedas, partly given up and partly took shape under the circumstances demanded by an effort on the part of these progressive non-Aryans and their descendants to acquire thoroughly the Vedic culture, a great deal of which was essentially connected with religious practices.

4. It is conceivable that these non-Vedic people consisting of Aryans and non-Aryans as well as mixed Aryans took more than ordinary interest in Aryan faith and culture, and

¹ F. E. Chatfield, op. cit. pp. 197, 198.

² Chatfield shows the period of the *Indrapur* and *Upanishad* texts, and, more recently, H. D. D. B. G. (Pindar), has taken his evidence from Chatfield, *ibid.* pp. 197-198. The *Indrapur* are characteristically the product of that period in which progressive Indo-Aryans were very much influenced by the culture of India.

later on they themselves began to get ashamed of their non-Aryan origin and wished very much to pass themselves off as through-bred Aryans.¹ But a great obstacle in their way was indeed the colour of their skin as well as their language and customs. For the time being difficulties seemed insuperable, but they did not remain so for a long time. Means were gradually discovered for concealing their ethnic and cultural origin.

7. The famous Poros-sāhita (Śigra, I, 30) having been revealed (c. 1000 B. C.) the question of colour became capitalistic without reference to any ethnic matters though such a thing had in a manner had to be recognized later in a rather sparsely formulated Purohitar theory of the Dharmasāhita to explain the existence of different non-Aryan groups which entered within the pale of the society regulated in the Vedic principles.

8. The language and customs were from their very nature ill-suited to remain hidden under the Vedic tradition. Hindu whether of speech or of other matters did not feel very hard. Though the suppression of their religious rites compelled them to renounce the Vedic tradition and to use the sacred tongue, the non-Aryans rarely used as their family or tribal stroke their traditional speech while during their intercourse with the Aryans a jargon consisting of varying degrees of Aryan and non-Aryan was predominant. The state of things, as one can easily imagine, was detrimental to the purity of the Vedic speech and occasionally gave rise to mischievous (corrupted) speech condemned as much by the custodians of the Vedic culture (Bṛhaspati as mischievous sat, etc. Patañjali, ed. Kielhorn, Vol. I, p. 3). Thus the necessary mixture was furnished to contemporary holders of the Vedic religion, who rarely included non-Aryans too, for studies in phonetics (Śikṣā), metrics (śāstra), grammar (vyākaraṇa) and

¹ It was possible for this to be based on the attempt to the part of some descendants of non-Aryans (present Indians) to pass as people of high birth caste.

vocabulary (śaṅkṣaś).¹ The contents of the *Kaṭya-sūtra* which branched off later on as 'Śaṅkṣa,' *Gāṛhya* and *Chandas-sūtras* may also be said to have received attention at that time when the non-Vaidikas were trying to overcome the appearance of thoroughbred Aryans and for this purpose they required a set of codified rules by following which they could be trained as Vedic ways. Oldenberg who does not pay any attention to the ethnic composition of the Vedic people seems to consider that a training in the Vedic ways was a purely indigenous one on the other Aryan classes. (See 'Buddha, His Life, His Doctrines, His Order,' Calcutta, 1915, pp. 14-15.) As, for various reasons the observation of correct date and days of the moon was already a necessity even before the conscious Aryanising activities began, the study of astronomy (jyotiṣa) commenced earlier², but it is probable that its results were not gathered in a written treatise till later when some of the earliest available texts of other Vedāṅgas have been composed.

5. One of the earliest references to the six *śāstras* of the Veda occurs in the *Sakalya's Brāhmaṇa* of the *Sāmaveda*³ which an Impugner generally has been considered to be pre-Pāṇinian.⁴ And in the *Māṇḍūkyaopaniṣad* (para 100 B.C.) too the six Vedāṅgas have been enumerated.⁵ In a passage of the *Chandogya Upaniṣad* (para 306-307 B.C.) we learn that as the authorities on the administration of justice the King was to take among other things the *Vedāṅgas* (VIII C, XI, 38; 568, Vol. 3), p. 294; Winternitz, op. cit., Vol. I, p. 529). In the *Apastamba*

¹ Prof. Ludwigsen Rany has a different opinion on this point (Introduction and Index of the *Śikṣaśāstra* and the *Śaṅkṣa*, pp. 141-142). He is of the opinion that the original *Śikṣa* grammar or *Śikṣaśāstra* is considerably earlier than Vedāṅgas (ib. 141).

² Śaṅkṣa Upaniṣad has represented the *Kaṭya-sūtra* as such. For something on the Sanskrit *Śikṣa* commentary to the 15 *śikṣa* in the *śaṅkṣaśāstra* of Śaṅkṣa.

³ See Müller, op. cit., pp. 312-3.

⁴ *Ibid.*, pp. 154-155.

⁵ Winternitz, op. cit. Vol. I, p. 131.

⁶ *Ibid.*, p. 134. For the name of *Śikṣaśāstra*, see Müller's note, op. 140.

Deviata stīra (c. 800 B.C.)¹ the Vaidāgas have been mentioned twice (I. 10, 28, 31, II. 4, 8, 10). This stīra was also everywhere the six stīras, one of which is of course the *Śikha* (II. 4, 8, 10).² In spite of these very early references to Vaidāgas with or without their number, earlier scholars were not prepared to admit that such references implied 'the existence of six distinct books or treatises intimately connected with the sacred things' and in their opinion these references implied merely the existence of six subjects, the study of which was necessary either for the recitation, the understanding, or the proper ritual employment of the Vedic hymns (Max Müller, *op. cit.*, p. 109, *Westerfield, op. cit.*, Vol. I, p. 268). But as we have seen before that conditions favourable for the rise of the Vaidāgas were probably to continue as early as 1000 B.C. and as the beginning of their studies at the time of the early Brahmanas are attested by reliable references the existence of written treatises on Vedic stīras about 600 B.C. can by no means be considered to be impossible. The most one can say about such works is the chance of reliable evidence, is that they have probably been lost. But to consider them to be non-existent after a lapse of nearly four centuries during which Vedic poems could compose voluminous Brahmanas will indeed be a unique piece of inconsistency. Max Müller's schematic division of the Vedic period into Gaudīya, Mūrtiya, Bṛhhaspati and Śikha periods perhaps be at the back of this kind of unreasonable view. It is not possible that such clearly divided ages ever existed; some overlapping has surely occurred, some at least of the Vaidāga treatises were written in the Bṛhhaspati period—may be towards its end. For it is scarcely possible that when an energetic and intelligent people like the Indo-Aryans were already composing works like the

¹ *Śikha*, Vol. II, stīra. See *Introduction* (Book "Apastamba and Śikha") in *DSB*, 1922, pp. 1028.

² 2. Chatterjee's phrase, without any publication the origin of the Vaidāgas between 1000-800 B.C. (see his *op. cit.*, *Śikha* (Vaidāgas), pp. 11-12).

Belongues, small treatises on the Vedāngas which, as we already noticed (§ 3), must have been a vital necessity with them about 1000 B. C. and after, were not then being prepared. Thus we are justified to assume that treatises on different Vedāngas might have been in existence between 1000-600 B. C.¹

Sanskrit

13. We have seen above under what possible conditions the Vedic priests might have turned their attention to the pronunciation of their sacred language and how this attention ultimately gave rise to the *Śaṅkha-sūktas*. But, as can very naturally be expected, the word *Śaṅkha* did not continue to mean the same thing during the different stages of its evolution.

14. According to Pagan (VII, 4, 585) the word *Śaṅkha* has been derived from the desiderative of *śak*, 'to be able.' Thus the literal meaning of *śaṅkha* will be 'a desire to be able.' It is very difficult to understand how this rather obscure meaning finally developed into 'pronunciation.' It is indeed due to this difficulty that Weber and Max Müller have on the *Chāndogya* text by a bold assumption that *√ śak* means originally 'to desire to know' (as *śikṣa* means) though it must be admitted that 'knowing' cannot very well be equated to "pronunciation."¹ But, from the discussion made above of the conditions under which *Śaṅkha* as a subject of study arose, the original meaning of this word seems to be plain enough. For were not the newly Aryanised people with their different ancestral speech-habit all able to recite the Vedic mantras in a faultless manner? Now it may well be assumed that the difficulty in their case was not so much that they had a totally different linguistic basis, was so great that learners among them had to have indeed a very strong 'desire to be able' to recite the *Trīṣṭup* hymns. Possibly on such a hypothesis alone can we understand how the original meaning of 'to desire to be able' came to be narrowed down to 'to desire to be able to recite the Vedas correctly' and from this finally

¹ See Weber, *Typological*, p. 1.

² *Wissenschaft und Kunst*, IV, p. 282.

developed the basis of the study of pronunciation. Thus the original import of the term *Śikhā* seems to have embodied in it an important history.

12. Now the Vedic pronunciation as we see from the *Śikṣā* and *Pratishādhya* was more or less a complex affair. But it is not so much possible that all phases of this complexity were felt all at once at the very beginning when attention began to be given to pronunciation¹, even in case of its being felt that different aspects of it could not be handled with success at the very beginning. Whichever might be the case it is pretty sure that with the early Vedic phoneticians (*Śikṣakāra*) matters were simple enough and only the fundamentals occupied their attention. Our evidence on this matter comes from *Pratishāh* who in his definition of a typical priest (*śikṣitva*) says that he should be able to use the (Vedic) speech with (properly inflected) words (*padā*), with (proper) accent (*svara*) and with the (properly articulated) speech-sounds (*śrīva*)². From this we learn that the observation of the proper accent as well as the right pronunciation of speech-sounds were *Śikṣakāra*'s chief object of study. And a later authority *Viśvanātha*, a commentator of the *ŚP*, defines the *Śikṣā* as *svara-vasānāśāśāstra*,³ the science which teaches accent and the speech-sounds (*śrīva*). *Madhusūdana Śaṅkarā* too says the same thing more elaborately.⁴ Hence we see that the correct production of speech-sounds in general and the pitch and quantity of words comprised

¹ To refer to speakers from we see in later times of different stages in the phonetic evolution of the Middle Indic languages (see B. E. Chatterji, op. cit.).

² In all Indic publicly accepted speech stage *śikṣā* is the primary *śikṣā* (see *Śikṣā*, Vol. I, p. 12). But in this passage that we meet 'Pratishāh' thought in the language *śikṣā* this is the meaning (see B. Chatterji, *Śikṣā* (Bibliotheca Indica) 1934 and also that we learn from *śikṣā* in connection with *śrīva* not with *śikṣā*. In *Pratishāh* it says that in this Vedic words are taught to show the three phases of articulation: adjustment of organs and the vocal words. This passage shows phonetic 're-adjustment' rather than *śikṣā*.

³ *śrīva* = *śrīva-vasānāśāśāstra* (see *ŚP*, ed. Benares, 1917 in *Varanasi* op. cit., p. 1).

⁴ *śikṣā* = *śrīva-śrīva-vasānāśāśāstra* (see *Śikṣā*, ed. Benares, 1917 in *Varanasi* op. cit., p. 1).

13. There may however be some objection to the above view on the following grounds: (i) in the Varṇa-samudāya long and plain vowels have been omitted, (2) unvoiced stops have not been arranged in the same order as the voiced ones, (3) the absence of *yama*, *śamādhā*, *śamādhā*, *śamādhā* and *śamādhā* in it and (4) the *k* of the stem *kā-pa-va* (2) and the *ka* final at the end denoting *k*, is interchangeable.

14. Now in reply to the first objection it may be said that a person learning short vowels correctly will naturally find it easy to produce their long and protracted varieties, and it is for this reason that the author of the Varṇa-samudāya did not probably like to make it unnecessarily cumbersome for the beginner by inclusion of these vowels, for the quantity of the vowel constituted a separate subject of instruction (see Pā. 1). That voiced and unvoiced consonants have not been arranged in the same order in the Varṇa-samudāya cannot go against its phonetic character; on the contrary, by varying the place of articulation in the utterance of the vowels their mechanical and hence wrong pronunciation has possibly been guarded against. Or it might be for the sake of his Preceptorial Program had to arrange the vowels like this. As for the omission of *yama* and *śamādhā*, etc., it may be said that being development of sounds already existing in the Varṇa-samudāya they do not appear there. Regarding the repetition of the vowel *k* it may be said that there were possibly two *k*'s recognized in the Old Indo-Aryan, one voiced and another unvoiced. The fact that the second *k* is taken along with *ṣ*, *ṣ* and *ś*, may justify us in making the above assumption. Prof. Stoll has tried to explain this double *k* by assuming that the Varṇa-samudāya might have been altered since its first formation and the last *ka* has probably been a later addition (Papers on Pāṇini, p. 52).

groups show that the chronological distance between Pāṇini and the early writers on Vedic phonetics as well as Pāṇini might be very great in the progress of tradition; that possibly Pāṇini and his text may be somewhat in the Vedic studies of the right to date.

15. As for the authorship of the Yargo-manuscript, we have no means of deciding whether it was made by some *pro* Papinian authority (Siva, Mijalovica) or Papian.¹ All we can reasonably surmise is that Papian might have adopted the already existing material (the *Lex Siva* in their original form), with certain changes, as the content of his posthumous, and the filled connected with his name was perhaps the work to which was prefixed the Yargo manuscript, and furnished the basis of Papian's grammar and phonetics. The relation of the P8 to that work which in its original form may go back to the last age of the Silver-Volans (1000-200 B.C.) will be considered later (§ 96).

14 The shape of the *Śloka* is given in the *Taittiriya Upaniṣad* probably brings us to the second stage in the evolution of this *Vedāṅga*. According to this *Upaniṣad* (II. 2) the *Śloka* consists of four 'pitch accents,' *uttarā* 'quantity,' *hata* 'stress,' *dhruva* 'pleasant in a medium tone,' and *audita* (anupita, 'euphonic combination.') While referring to the *Śloka* in his introduction to the *Śrauta-sūtra* Śākyas thinks of the developed state of this *Vedāṅga* even when he says *varṇa-samudhāraṇa-samādhānaḥ sūtra samudhāraṇa et alak*; for he brings in the

³ The equivalent to the terms given above is found in Rollin's *History of the Third* (p. 10) and *History of the Fourth* (p. 10). Rollin's *History of the Third* (p. 10) and *History of the Fourth* (p. 10) are also found in Rollin's *History of the Third* (p. 10) and *History of the Fourth* (p. 10).

15. The *Śhīla*, as a well-known, refers to the different *Yajur* schools; but we do not know whether the *Śhīla* refers to the one undivided *Yajur* or to each of the different *Yajur*, such as, *Īk*, *Śiman*, *Tajur* (Black and White), etc. Let us first consider the case of an undivided *Yajur*. From the story occurring in the *Mahābhārata* and some Purāṇas that *Iravatyajpati* Manu divided the *Yajur* into four parts we may infer that the *Yajur* mantras existed once as an undivided corpus. The fact that particular mantras are found in more *Yajur* than one, hints that the mantras were collected under different names chiefly with a view to their ritual use. For example, the collection of mantras made for the use of the *Īk* was called *Īk* and that for the use of the *Adhvaryu* was called the *Tajur* while the *Udgīta*'s collection was called the *Śiman*. Now the principle according to which the particular mantras could be put under different labels was the same as that which has been traditionally at the root of the division of the *Yajur* into schools. For, says Mahābhārata's commentary on the *Hiranyak*

† For details on *Salmonella* Typhimurium infection quantified, consult the R.E. and 1991 article on "Typhimurium".

Since we learn that one of the reasons which gave rise to *śikṣā* was the manner of reciting the Vedas.¹ This being the case we can well say that from one original Veda came out first of all *śikṣā* like *Ri*, *Samān*, *Yajus*, etc.² For, the uttering of Vedic mantras by different classes of priests was different; the Hotṛ recited the *Rasa* with his normal voice, the Adhvaryu muttered the *Yajus* softly, while the Udgātṛ chanted *Samān* loudly.³

19. But the threshold *śikṣā*, if we are allowed to postulate this, must have existed at the very beginning of the period which witnessed the growth of Vedic ritualism, or roughly in the period preceding the Rikmantra. From this period onwards the Vedic people, that is, the Aryans together with the pre-Aryan ethnic element which they might have absorbed, began to settle themselves in widely separated regions of the Indian continent where assimilation followed. The diffusion of the Vedic people, their culture and religion gave rise, in course of time, to difference in pronunciation of the mantras, and mantras being orally transmitted some of them came, in course of time, to be used in different places with more or less different word order, and a difference in the order of mantras constituting them also arose. It is probably these factors that brought forth different *śikṣā* in the generally accepted sense and they were, in fact, *śikṣā* of *śikṣā* or secondary *śikṣā*. *Pāṭhābhya* relate to all such *śikṣā* in existence at the time of their composition or final redaction. But separations among the different branches of the Vedic people resulted not only in the

1. *Śikṣāśūlī* (Sopranasikṣā) et alia Mahāśūlī. See Max Müller, *Journal of Theological Studies*, 1883, p. 127.

2. Max Müller (loc. cit.). The word *śikṣā*, however applied to the three original Samāns, the *Yajus* and the *Samān*, these *śikṣāśūlī* and the *śikṣāśūlī* is related to one another and without reference to other kinds of *śikṣā* belonging to mantras of other Veds, pp. 126-128. *Yajus* too of original nature will refer to the Vedic literature when 3-54. For Sanskrit literature takes due reference to the text, p. 127.

3. Max Müller, *op. cit.*, pp. 126, 127; *Śikṣāśūlī* (Sopranasikṣā) (II), 1, 16-17.

difference of pronunciation of the maxims but also a variation of their auxiliary rules and vocal laws and customs. Thus the *śikṣā* came to relate also to a difference in such maxims,¹ though *Pratishākhya* had nothing to do with such *śikṣā*.²

50. Now the exact sense of *śikṣā* having been determined we shall proceed to ascertain the sense of the term *Pratishākhya*. According to Max Müller who wrote in 1859, '*Pratishākhya*... does not mean, as has been supposed, a treatise on phonetic peculiarities of each Veda, but a collection of phonetic rules peculiar to one of the different branches of the four Vedas, i.e., to one of these different texts in which each of the Vedas had been handed down for ages in different fractions and different parts of India.'³ This view has been subscribed to by Whitney in his edition of the *Ātharvaveda Pratishākhya* (1892).⁴ Since then almost all the scholars have followed this view.⁵ But such an opinion seems to have been expressed on very inadequate grounds. For, Mitharan, quoted by Henderson Sauersti in his gloss on the *Sūtra* Kṣa. (P. IV. 3. 58), explains *Pratishākhya* as *prati-śikṣāya bhāṣanā*.⁶ And Anantakhaṇḍa too in the introduction to his commentary to the *Sūtra-Yajur-Pratishākhya* defines the word similarly and shows, after an elaborate discussion, that Kṛtyayana's work relates to all the fifteen *śikṣā* which descended out of the *Sūtra-Yajur-veda*.⁷ From the testimony of Dargé also we learn that the *Pratishākhya* related to more schools than one. For in his commentary to the *Śrīrāta* (I. 17) he says: *īkṣaḥ parivāḍita? anuśāśana-parivāḍita eva yathā*

¹ See above footnote 1. 'Śikṣā' in *Śikṣāśāstra* means: *śikṣā* *śikṣāśāstra*, i.e., *śikṣā*, *śikṣā* and *śikṣāśāstra*.

² The word 'śikṣā' used hereafter in this essay will mean, unless otherwise specified, a phonetic-śikṣā only.

prathibhāṣaḥ saptaḥ. *am pādāṅgrāṣaḥ prapāṣaḥ kṛpāḥ anukāṣaḥ*
śāntakāṣaḥ again the initial *prapāṣaḥ* prathibhāṣaḥ 'is
 omitted'. These Pādaḥ lines by which in a Purāṇa of one's
 own Gṛāṁa, the pronunciation of accents, straight, being-trailing,
 prapāṣaḥ words and separation of words are laid as explained for,
 and restricted to each śikṣā are called Prathibhāṣaḥ.¹ Max
 Müller who quoted the above passage may be said to have
 misunderstood it. Prathibhāṣaḥ which he translated as 'to
 certain śikṣā' should be equivalent to 'to each śikṣā'. It
 should be noticed in this connection that Max Müller's transla-
 tion of the passage is not in agreement with his own definition of
 the term Prathibhāṣaḥ quoted above. However the fact lies
 principally with commentators like the author of the Yāgyalk-
 tharṇa, whom Max Müller in all likelihood followed. For in
 the last named work which does not say anything about the
 exclusive phonetic character of śikṣā in a Prathibhāṣa, it has
 been suggested that the Prathibhāṣa relate to a group of
 śikṣā.² This suggestion seems to give partial support to
 Mathura's and Kāśikābhāṣa's testimony referred to above. For
 it does not restrict Prathibhāṣa to one only of the many
 śikṣā.

The word Pāṇḍa which is a synonym for Prathibhāṣa
 seems to give some clue to the solution of the problem whether
 Prathibhāṣa relate to only one or all the śikṣā of a Veda.
 In Nārāyaṇa's commentary to a passage (śāntakāṣaḥ
 śāpāḥ śāntakāṣaḥ) in the Gāthā-Ūpadeśa-śikṣā
 we find the following *śānta pāṇḍaḥ śāpāṇḍaḥ śāntaḥ* 'in
 separation from. śāntakāṣaḥ śāpāṇḍaḥ śāntakāṣaḥ śāpāḥ
 in separation from. śāntakāṣaḥ śāpāḥ śāntakāṣaḥ śāpāḥ śāntakāṣaḥ'.
 From this passage we learn that students belonging to different
 Veda schools could take their lessons from one Ācārya who
 together with his pupils constituted a Pāṇḍa or Pāṇḍa. Thus

¹ Max Müller, *op. cit.*, p. 111; In Thores translation Müller's 'to' is interpreted as
 each śikṣā (Prathibhāṣa *op. cit.*, p. 11).

² On the P. P. (P. P.), *Śikṣāṅgama* (P. P.), p. 11.

Prasāda often evidently related to each Prasāda comprising different schools of a Vaśa. Hence it seems justifiable to conclude that Prasāda-sūtras or Prasādikāyas related to each one or all the Śākhās of a Vaśa.

21. By taking what seems very much to be a wrong view about the meaning of the word Prasādikāya or the scope of a work so named, Whitney fell into confusion over naming the Prasādikāya of the Kṛgga-Yajur-veda as the Taittirīya Prasādikāya.¹ The very fact that this Prasādikāya mentioned the Black Yajur schools like Mānḍūkya and Śāraṅga as well as Taittirīya, made it very inconsistent for him to attach the Prasādikāya to the last named school (Taittirīya) only. But still he considered it prudent to adopt the name Taittirīya for the work, though it did not quite satisfy his great critical acumen. For he confessed that "we are far from fully comprehending as yet the origin, nature and relation of the "schools" of Vedic study and their conceptual texts or pīthas."² Thus, however, was not the attitude of Whitney a few years earlier when he added the Atharva-veda Pr. and had recourse to conjectures of varying degrees to explain away the discrepancies between the theory current in his time about the nature and scope of Prasādikāyas and the characteristics of the Pr. in hand. He attached this Pr. to the Śaṅkhya school of the Atharva-veda and troubled himself about the problem why in certain points it was not in complete agreement to the Veda of this school. He told himself the Pr. in question related also to other Atharva Śākhās which in all likelihood perished or were all then embraced.³ Hence in his edition of the Atharva-veda Pr. Whitney writes "It is.....possibility of the authors of our text to give their rules wider scope than the vocabulary of the Atharva

1. See p. 201 of Whitney's ed. of this Prasādikāya, now published in 1971.

2. Whitney, *U. Pr.* p. 207.

3. The Taittirīya-Śākhā of the Atharva-veda. However, since Whitney's ed. of the Atharva Pr. should be transferred in this connection.

requires, in many instances contemplating and providing for combination of words which are found nowhere in the body of Vedic scriptures, and for which accordingly the commentator is obliged to fabricate illustrations (p. 580).¹ Now whatever may be said about the genuineness of examples given by the commentator who was possibly very late, it cannot be said that the author of the *Pratishākhya* based his rules on non-existing materials. In view of the tradition that Veda, in different periods, came to be lost and had to be recovered, it will not be difficult to assume that some of the *śikṣā* with their texts passed beyond recovery.² Even if his objection against the commentator in some rare cases may not be untrue, Whitney himself has admitted that 'there are certain number of sentences among those given by the commentator which have more or less clearly the aspect of genuine citations from Vedic texts; and although some might be regarded as instances of carelessness on his part quoting by memory from another source than his own Veda, we cannot possibly extend this explanation to them all; it must remain probable that, as post at least, they were contained in some *śikṣā* unknown either of the *Adharma-veda*.'³ From these passages one will easily realise the verisimile nature of the material given to *Pratishākhya* by Whitney, his predecessors and followers.⁴

23. Max Müller, in his introduction to the *Śa-Pratishākhya* (1875) does not care to examine in details the deviations of the *Pratishākhya* from the available *Śvedā* text (of *Śikṣā* recension). This may be said to be due particularly to his strong belief that *Pratishākhya* was concerned with one *śikṣā* of a Veda. Hence, he very summarily disposes of the question of relationship between the *Pratishākhya* and the *Śvedā* (*Śikṣā*) text by saying that, as "in all essential points our own best

transcripts of the text agree with the data in the Ptolemaica, we may probably conclude that the text of the *Agroika* we possess is the same as seen by the authors of the Ptolemaica more than 2000 years ago.¹¹ Along with this should be remembered what he himself wrote in the introduction eleven years earlier. In the *History of Ancient Swedish Literature* (1858) Max Möller wrote: "There is not a single MS. or printed edition of the *Agroika* in which rules of our Ptolemaica are uniformly observed, and the same applies to the MSS. of the other *Tydas*."¹²

2240) Burwell, too, in his introduction to the *Śikṣasamuccaya* (Mangalore, 1979), considered by him to be a Prākritiḥya of the Saṃskṛta-śikṣa, thought that Prākritiḥya belonged to one of the many śikṣas of a Veda. He attached the Śikṣa to the Eastern śikṣa alone and made some conjectures as to why the Prākritiḥya could not be connected with Jaiminiya, Taittiriya or Bṛhadgandya śikṣa, and he assumed that Prākritiḥya connected with these śikṣas had been lost. But all these assumptions seem to be unfounded. For example, characteristics of some Saṃskṛta śikṣas such as the codified *l* and short *a* and *e* were as all probability phonetic developments occurring or recognized later.¹ There can be nothing against such an assumption. For there is the traditional view that the difference of śikṣas arising from differences in uttering mantras is without any (historical) beginning;² and from this we may deduce that even after the Prākritiḥyas were written new differences in pronunciation

should be called secondary slaves.¹ When judged by the standard set up by the First Up for Slaves (pamphlet), the Petistikhrya may be found wanting in certain respects.² For example, the treatment of slaves and helms is non-existent in them. But it can well be assumed that as these two topics were exclusively matters of oral instruction the Petistikhrya did not discuss them.

24. As far as the date of the Ptolemaïques which as we have seen can be called the secondary Épiphe, their rise and development, at least of the older ones among them, can be roughly placed between 300-200 B.C.¹ A detailed discussion about the date of the Ptolemaïques will carry us far beyond the scope of the present work. But in support of the lower limit to the date of the early Ptolemaïques it may be mentioned that the passages from the Taittiriya Pr. and Atharva. Pr. occur in the Mahabharata of Pañcālā (c. 250 B.C.). Pañcālā's long to the Pr. has already been pointed out by Dr. Gildemeister. Varanasi the acquaintance of the Brahmanas with the A. Pr. has not been pointed out before. Under the Varttika to Figure I.I. 10, Pañcālā² quotes *agnisya agnidyah āgavam- tadaprahmā antastaditām. dvistvam āgnidyah tad āgavamaṁ. nardiyam*, according to [MSS. A & dvistvam tad āgavamaṁ]. Here we have verses 29-32 of the APy. with the difference that the word order of the *dvistvam āgnidyah dvistvam* on has been changed and as has been omitted. The accompanying note in Pañcālā's quotation shows that he has quoted from some other work, which was evidently the APy.³

1. das Bundesgesetz über die Bundesverwaltung, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 267

¹⁴ Recent attempts have been made to identify the active site of the enzyme by measuring its pH optimum. The amino-acidic side chains of Tyrosine Kinase, Tyrosine Phosphatase, Leukine PHN, pp 18-19, R. B. Smith, et al., *biochemistry*, p. 6. The Tyrosine Kinase is also known as the H₂O kinase, which catalyzes the phosphorylation of tyrosine residues in proteins.

TUMBLA Script

22. *Its contents.* The P^h as we have reconstructed it from different recensions, contains only eighteen complete or nearly-complete copies through the longest (P^h4) recension includes no less than *forty-two* additional complete¹ most of which are on the same leaves. The extreme shortness of this *Shukla-Yajurveda* can well be compared with that of the *Chanda-Yajurveda* which is embedded in the *Chandak-ritika* of Paṇḍita, and contains only 37 stanzas which will scarcely be much larger in extent than the P^h.² But in spite of its extreme brevity the P^h was more or less a complete manual on the pronunciation of the Vedic speech-sounds in general at the time the work was composed.

In the first two complete the P^h enumerates the speech-sounds (*varṇas*), vowels and consonants have been separately mentioned. The next four complete (3-6) give a theory of production of the speech-sounds. This is followed by a five-fold classification of these sounds according to their pitch, quantity, place of articulation, primary effort (*garveta*) and the secondary effort (*anagradita*) (7-16). It goes without saying that pitch and quantity primarily concerned vowels while the remaining items all the sounds. The sounds mentioned in the P^h are shown below in phonetic script according to their classes.

¹ Some of the additional passages, e.g. P^h 45, 47 are not so 'complete'. We, however, have called these complete only as a matter of convenience.

² See Mahananda Ghosh, 'The *Chanda-Yajurveda* of Paṇḍita' in *IEU*, 7-8, 1912, 1913, pp. 161 ff. ; *Wiley Ind. Stud.*, Vol. 1, pp. 105-107.

Table B
Pigini's Classification of Speech-Sounds of the O.T.A.
 1. According to Place of Articulation

		labial	labiodental	dental	alveolar	palatal	velar	glottal
voiceless	stop			p	t	c	k	ʔ
	fricative			f	s	ç	x	h
	nasal						ŋ	
voiced	stop	b	(b, β)		d	g	g	ʔ
	fricative							
	nasal							
voiceless	stop							
	fricative							
	nasal							
voiced	stop							
	fricative							
	nasal							
voiceless	stop							
	fricative							
	nasal							
voiced	stop							
	fricative							
	nasal							

2. According to Prolongation

voiceless	a, ɛ, i, ɔ, u, ɐ, ɐʔ (= ʔ a, ɛ, i, ɔ, u)	aa, ɛɛ, iɪ, ɔɔ, uu
voiced	ɛ, ɐ, ɐʔ (= ʔ a, ɛ, i, ɔ, u)	
voiceless	ɛ, ɐ, ɐʔ (= ʔ a, ɛ, i, ɔ, u)	
voiced	aa, ɛɛ, iɪ, ɔɔ, uu	

1. These six Dialects have not been used in the D.R.

in his first *Prakāśikā* with the small *śloka* compilation which is generally quoted as the *Yodhāga*, the difference of old and modern *śloka* will at once be perceived.¹ As he has not expressly laid down the criterion with which to distinguish between the old and the new *śloka* we cannot judge the strength of his argument; but *śloka* which he considered to be modern in structure might well have been among those which we have had to consider spurious. Whatever may be the fact, the *śloka* metre in which the reconstructed *PB* has been composed appears by no means younger in age than that in which works like the *Bhaddarvāṭa* (c. 400 B. C.) has been composed.

Four important characteristics of the classical Sri. Slokas are: (i) if every pāda the 5th syllable shall be short and (ii) the 6th syllable long and (iii) the 7th syllable of the first and the third pāda shall be long and (iv) that of the second and the fourth pāda shall be short. Now in the Pā. (as reconstructed by us) the 5th syllable of the pāda is long three (Ca, 12a, c) and the 6th syllable short seven times (1a, 3a, a, 6a, 8a, 11a, c) and the 7th syllable of the first and the third pāda is short seven times (1a, 3a, a, 8a, 11a, c) and the 7th syllable of the 2nd pāda is long once (9b). Considering the fact that the Pā. consists of 18 slokas only there 18 instances of metrical irregularity is enough to show their artificial nature.

25. *Its place in the Indian Literature* In his commentary to Jambhikā's *Three-entangled vines Sāhitya* (c. 200 A.D.) once (on l. 1/28) mentions the 'authors of the *Sāhitya*' (polytheistically) 'Placed being evidently used for showing respect we do not know from this what particular author of *Sāhitya* had in mind

1000

* α_{ij} is used to indicate in this paragraph the book, country, district and the local number of a book.

J. W. M. H. van den Broek, J. A. M. M. van der Wal, & G. B. S. de Vries

¹ *It seems likely that the number of people who are able to read the words of the Bible will grow in the next few years.*

29. In the absence of suitable data on the point we may explain this anomaly by the fact that the ancient Indians did not set any value on history so much, their only care being the *Śāstras* and not the *śāstros* or their dates. They however took notice of the most important fact about the PĀ that it was a Vedic text and concerned all the Vedas.¹

But the great importance attached to the PĀ by these authorities is apparently weakened on the following grounds: The places of articulation for the sounds *r*, *s*, *ś*, *ṣ* and *l* as given in the PĀ do not correspond to those given in the *Pratishākhya* and some of the late Śāstra; and sounds like *ṛ* (ॠ) and *ṛ̥* (ॡ) found in some Vedic texts do not occur at all in the PĀ though they make normal appearance in the *Pratishākhya*.

30. But looking more closely into these items we shall find that there cannot be any real difficulty on these points. For we have seen before (§ 20a) that one aspect of different treatments on the Vedic phonetics is that they in a way help to trace the development of the spoken Indo-Aryan since the inception of the Sanskritian period reaching to the Middle Indo-Aryan stage, and it is pretty sure that these sound-changes interlarded with the correct pronunciation of the Vedic mantras. Thus *ṛ* (ॠ) and *ṛ̥* (ॡ) can easily be explained as later developments.² Mr. G. V. Vaidya thinks that these sounds were non-existent in the Vedic and developed later due to Dravidian influence.³ This opinion seems to be extremely wrong. The change of place in case of the articulation of *r*, *s*, *ś*, *ṣ* and *l* also can be explained as a similar fashion as later developments. Thus we should have no objection in admitting the Vedic character of the PĀ.

There seems to be another fact which goes in favour of the view presented above. As we have seen before (§34) that the P₂ has a theory of production of the speech-sounds (§46). The (Turk. Pr.) surely betrays an acquaintance with it. The acquaintance of the Vlt. Pr. is probably direct.¹ The Sk Pr. (I, 187) too seems to have known this. It is not clear if the AP₂ knew of it. But the silence of the last work may well be explained by assuming that its author did not probably consider it necessary to include the theory in his volume, for he might well have assumed a knowledge of it on the part of the readers.

81. Thus we can well take the P₂ as the *Śikṣa-Vedāṅga*. This view will be further strengthened when we shall discuss below the relation of the P₂ with the *Apṛādhyaṅgi* and will produce evidence to show that the two works in all likelihood proceeded from the same master's hand. But before taking up the relation between the P₂ and the *Apṛādhyaṅgi* we shall have to examine the claim of another work for the position of the Vedāṅga. Dr. Bagha Varā is an article named 'Discovery of the lost Phonetics Śikṣa of Piṅga' published in the J. B. A. S., 1941, (pp. 623-8) claims to have discovered the lost Phonetics Śikṣa of Piṅga. From the several arguments which he puts forth with great enthusiasm it may appear that the latter work of his discovery (DPS or Daykanda's *Phonetics Śikṣa*) is the Vedāṅga Śikṣa. But on a closer examination of the arguments we find that they are not as sound as Dr. Bagha Varā believes them to be. He starts with the assumption that the DPS is the lost phonetic sūtra of Piṅga though no independent authority

¹ *विष्णुसूक्तं*, *सर्वं सूर्यः*, *सर्वं सूर्यः* (MS. 1041) *Vedāṅga* (MS. 1041) for the words of § 38.

² *सु. विष्णुसूक्तं*, *सर्वं सूर्यः* (MS. 1041) for *सर्वं सूर्यः* (MS. 1041) for the words of § 38.

³ *सर्वं सूर्यः* (MS. 1041) for *सर्वं सूर्यः* (MS. 1041).

The view of 'Sikṣa' which is an acronymic word has to be compared with the P₂ MS. which has 'Sikṣa' as an acronymic word (Sikṣa-Sikṣa).

attests its existence or the story of its alleged loss before the present time. Dr. Bagha Var's allegation that Pāṇinīya and other grammarians borrowed passages or their substance from this older work (DPS) is extremely unhappy. For this borrowing might well have occurred the other way round, that is, the author of the DPS might have culled his materials from earlier sources such as the *Mahābhāṣya* and the *Vaṃśa*-*śloka* of *Caṇḍaḥṣṇa*.¹ In the face of facts that there is no ancient or modern MS. or any descriptive reference of it in any early or late work to search for its authenticity,² one may well be justified to take such a view. Along with this should be considered the following facts about the PS:

(i) It has been styled in the *Yājñika Śāstra* by Śhlyana and Śhāṇḍakya Karmadhā.

(ii) It has no less than what may be called few different recensions, and numerous MSS. of each such recension.

(iii) It has two old commentators. Thus we see that in marked contrast to the PS, the DPS, the alleged phonetic *Sāstra* of Pāṇini, have remained in oblivion for about two millennia, and a hell to be discovered only at the beginning of the nineteenth century. Though such a discovery may not be totally impossible, one need be very cautious in such matters. The discovery of Kaṣṇīya's and Śhāṇḍa's works cannot be brought here as a parallel case, for quotations from these works have been shown to have occurred in fairly old documents.

(iv) From materials which Dr. Bagha Var has so ably collected in his article³ we can well see that the DPS is not an old work. On referring to a recent catalogue (p.15) of the *Yājñika Pustakālaya*, Agart (August 1988), published by the Arya Samaj, we find that the DPS constitutes the first among

1. The *Vaṃśa*-*śloka* here, here given as the appended Dr. Fred Thomas refers to the Indian Sanskrit Library which Dr. Bagha Var mentioned in Pustakālaya op. cit. p. 100.

2. One instance of sup. MS. of the DPS has been noted in doubt in the light of Dr. Fred Thomas on topics the last century of the work cited.

3. J. B. A. S. 1985-86, 103-11.

the fourteenth editions of the *Pratyaṅga Prāśasti*, a grammar which Śaṅkara Deṇḍananda compiled for the use of the *śāstra* students. It is probably due to inadvertence that Dr. Bagha Van did not mention this fact in his article. The different editions of the *Pratyaṅga Prāśasti* including the first one have also been noted separately. The first of these editions bears the title of the *Varma-sūtra-sūtra* by Pīṇa. This sūtra-work as has been shown by Dr. Bagha Van (loc. cit.) resembles the *Varma-sūtra* of Candragomin, the Buddhist grammarian, who flourished about 600 A.C.¹ Considering the great influence which Candragomin exercised on the grammarians of Pīṇa's school (see Kāśikā and the *Vākyapadīya* showing traces of such influence) it is quite possible that some late grammarians re-edited and amplified the *Varma-sūtra* of Candragomin and fathered this upon Pīṇa, evidently for imparting to it a superior authority. Though there is no sufficient material to prove this we are inclined to suggest that this late grammarian was Śaṅkara Deṇḍananda himself who, among other things was a very close student of Śaṅkara grammar as his *Vākyapadīya* and the edition of Pīṇa's *Ashtādhyāyī* show. But whatever may be the actual fact about the authorship of the DPA, it is sure that the work is neither from the hands of Pīṇa nor an old one.²

23. *Dr. Anthon*. Now if we are sure about the fact that the PA is the real *Pratyaṅga Śikṣā* we shall have to take up the problem of its authorship. Though the work has probably been drawn upon by very old authors³ its author has not been

1. This date is assigned by S. B. Kirtikar (*History of the Sanskrit Language*, p. 48). Dr. Kirtikar's view places it in the 7th century (see his *Critical Edition*, p. 4) as the latest.

2. Dr. Paul Thieme, with a somewhat different line of argument, identifies the grammar with Pīṇa's *Pratyaṅga Sūtra* transmitted by Dr. Bagha Van (see his *Pīṇa and the Sūtra*, p. 46). We do not agree with him on all points.

3. Dr. Paul Thieme (translation of *Pratyaṅga* from the PA, in Pīṇa's work), he would have referred to it by grammarians himself and would have quoted it with the same respect as Pīṇa's grammar (p. 46). Bagha, on the PA, has not been referred to by Pīṇaśāstri, nor any mention is made by Dr. Thieme (with its relation with Pīṇa). But as would be a mistake to place too much confidence in the agreement of all these, which may be otherwise explained.

among the art branches of the Ministry of Education. Can there be a better evidence of Pagani's scientific knowledge of phonetics? But this evidence alone is not sufficient to identify Pagani with the author of the P&S. What we may gather from the above is that of the two names Pagani and Paglia proposed for the authorship of the P&S, the case for the former is stronger.

(b) Besides this a comparison of the contents of the Aephdyt and the Pk. further strengthens the claim of Figure 1 to the authorship of the Pk. From such comparison we gather the following facts' pointing to the handiwork of the same author.

(c) In the PG. Physical Principles, such as air, car, glass, sea, soil, etc. have been reclassified.

(iii) hs , cs , ps , ts and ps have been used to indicate negatively h , s , t , i and p groups. This convention has been formalized in the Appendixes (I, II, III) under the headings of 'terminology'.

(vi) The FE (37) includes the Aristotelian *idē* speech-words while its definition has been given in the *Metaphysics* (I, 1: 9) *metastēnōn* *exōn* *antisthōn*.

(iv) The explanation of terms like *bruno*, *diplu* and *pladu* has also been discussed in Ch. 3, §7, under the heading *bruno-diplu-pladu*.

(c) According to a rule of deletion as laid down in the Aṣṭaṅgī (VIII 4.1), *r* after *r* and *y* turns to *ṣ*. From this we get *r* as a cerebral sound. According to the Pā. (II) too *r* as well as *r̥* is a cerebral sound (Pettahākyas have *r* either in the roots of the tooth or close to the tooth (see Vasva, pp. 211, 25, 51).

All these fairly settle the question of the authorship of the P⁶. Now the important question arises which of the two, the *Antiphylax* and the P⁶, was composed first. To find this out we must remember once more the different branches of the Sibylla as enumerated in the *Fath. Openaq.*, namely, *more, matri, bala, stera* and *mathia*. P⁶ and as we have

¹ Figure's height: height to top of the figure. The height under study here is the first 15 cm of the growth of the germination of the seeds (see table 1, p. 66).

used the word *piśaṇa* which they think could not have entered India before Alexander's invasion. But this argument has been very ably refuted by Professors S. K. Belvalkar and H. Geldner—Belvalkar, *Systems of Sāh. grammar*, pp. 28 E; Geldner, *Papers on Pāṇini*, pp. 24 E.). The latter has shown very convincingly "that all Indian poems must have entered this language before 500 B. C., and there is no reason at all to locate PĀṆINI as Indian after Alexander the Great on account of the borrowed *śāstra*." "Moreover Prof. Lachick has proved that PĀṆINI'S rules apply to the language of the Brāhmanas, some obsolete (perhaps archaic) forms only regarding the language from that of the Brāhmanas (*Papers on Pāṇini*, p. 30). On the basis of this finding of Prof. Lachick, Prof. Geldner thinks that Pāṇini must have belonged to the latter Vedic period of the Indian literature (loc. cit.). Prof. Lachick however is not willing to assign Pāṇini to a period before Buddha (*Pāṇini*, p. 84 Wimmeria, Vol. III, p. 355). But he seems to have been over-cautious in the matter. For he himself admits, according to Prof. Geldner, that Pāṇini seems to be later than that of the Śāstra (op. cit., p. 41-2). Prof. Geldner concludes on the basis of the view of Prof. Lachick that we could be inclined to place Pāṇini in a period shortly preceding the Śāstra literature proper (loc. cit.). Now the *śāstra* works which are considered to be among the oldest have been placed ca. 800 B.C. (Monier-Williams, *India's Past*, p. 130).

56. From the above discussion it appears that Pāṇini was most probably earlier than 500 B.C. And there seems to be other facts too which seem to corroborate this view. For example the *Aśṭadhyāyī* which mentions the Brāhmanas literature as having been four times (II. 3. 68, IV. 1. 64, I. 103, V. 1. 42) and distinguishes between the old and the new Brāhmanas, does not refer to the *Aranyaka* literature though the word '*Aranyaka*'

1. Geldner in the *Feet of the University of Berlin*, VI, 2 1911, concludes that the grammarians from Alexander the conquest. His conclusion Geldner's acquaintance with Sanskrit and the *Aranyaka* literature also seems to be in accordance. (Translation of the *Yajurveda* p. 1014.)

in the sense of 'Insect dweller' has since (IV, p. 129) been mentioned. That Katsipaka composed a *Virtutis* to extend the use of the word "krupaka" to an subtype (most probably of the Bethmann) may be taken to mean that in Pagine's time the Krupaka appendices to the Bethmanns were not yet written or even if they might have been written they were not styled as the Krupakas. Now accepting the second alternative as being more likely we can place Pagine at the close of the Bethmanns period. Along with this we should mark another fact, viz., the non-occurrence of the word 'apamati' in the sense of 'most instructive' and orthoephiological texts containing them as Pagine's *Applidiotas* (Pagine, I, 4, 79, indeed has the word 'apamati' in the compound *apamatiariti*)² which literally means 'sitting very close to', i.e., in a private manner. Now we may well conclude that the Krupakas which contain *Upamatis* were not all at the time of Pagine, for they were not yet known as Krupakas or *Upamatis*. Now the oldest among the *Upamatis* are considered to have been compiled about 500 B.C.³ Hence we should not place Pagine later than 500 B.C. It is likely that Pagine lived some time earlier than that.⁴ The diphthongal character of *i* and *e* which Pagine has recorded in his *Sikha* (UR) shows that the language described by him was in the same stage of evolution as the Old Persian of the *Conchiform Inscriptions* (500 B.C.) of Persopolis. For this latter language too has diphthongs corresponding to our *i* and *e* (see Malet, *Grammaire du Vieux Pers.*, pp. 58 ff.). As we have no Old Persian Script we do not know what the actual phonetic value of diphthongs as [ik i] and as [ik e] was. It is likely that the graphic system was ahead of the phonetic development. The fact that Pagine has

[illegible]

4. On Paul Thoreau's notion of "style," see his comments on the following passage: "The style is granted, that it is not composed of a line when the language of the North was just about to emerge" (20, 25, 3, 32).

given rules in his grammar of the proper accentuation of the older words (VL I, 181, although *blāpāḥ*, VIII 2.38, Porcupio to *blāpāḥ*) shows that the current language of his time was much ahead of the classical Sanskrit (which has lost its accent) and was nearer the Vedic phase (though in its very late form) of the Old Indo-Aryan than the latter. In addition to this we should also notice the fact that Pāṇini's grammar was originally accepted like a *Mātrā* or *Brahmana* text (rule note § 32) and as such it should be assigned at the latest to the class of the poems of the Brahmanas.

CONNECTIONS TO THE P⁸.

§§. The *Šikṣa Paṭiśā*. The MSS. and the printed text from which the present edition has been re-constructed have been described before (§ 96) in connection with the text of the P⁸, revision of the P⁸. We are now giving below the main instances of the secondary reconstructed. The P⁸-revision of the P⁸, as we have seen before (§ 96) arose into existence between 800 and 1100 A.C. Hence the *Paṭiśā* itself may be tentatively placed somewhere in the 12th century. Thus the work which may be as old as seven centuries seems to contain some old materials. Some of these, such as a reference to *Āditya*, has already been pointed out (§ 96). These materials will be discussed below. According to the *Paṭiśā*, the *śikṣa* is the science by which the pronunciation of speech-sounds is learnt (*śikṣa* = *śikṣa* in *śikṣa*, p. 8, lines 3-5). This is to be compared with the term *śikṣa* occurring in the BPr. (XIV, 50). It is not possible that the author of this work has referred by this term to *Pratīśā*, and this being the case *śikṣa* refers to the *śikṣa* of the early period when it still lacked the later elaboration as observed in the *Pratīśā* (see §§ 14, 50). Hence the BPr. has scarcely any legitimate claim to interpret this word as '*Pratīśā*', which must have existed considerably earlier than the time when the BPr. was compiled. The *Paṭiśā* in the definition of *śikṣa* quoted above seems to have perceived this tradition which agreed so well with the fact that the P⁸ deals merely with the utterance of the speech-sounds of the Old Indo-Aryan as represented in Vedic texts. Besides this it gives us some information on the following points:

- (a) There are two surnames (p. 10, line 14; p. 12, lines 9-10). No other authorities seem to have taken notice of this fact.

(b) A quotation from the *Ābhidharmasūtra* Up (p. 18, lines 52-53) occurring in this commentary seems to some extent from the text of this work as received from Śālistambapala.

(c) In the reconstruction of the P5-13 this commentary has given a valuable hint (see p. 18, lines 6-7). From this hint we may assume that the author of the *Pañjikā* had P5-13 as reconstructed by us. But he however could not rightly explain this passage.

(d) It gives us the old name for ascetics as *śāśvatsā* *śāśvatsā* (p. 18, lines 12-13). For details about the ascetics see Note 27.

So much for the importance of the *Pañjikā*. In spite of its valuable aspects it should not be considered infallible. It has the weakness of average commentaries of Śāi and Pāi works. Sometimes it gives information and explanation which are not accurate. For example, the *Pañjikā* considers *prapañca* as twofold in spite of its Śāi text (see p. 14, line 13). It is possible that he failed to understand the passage (18) properly. The same appears to be the case in its determination of the quantity of the compound parts of *śāśvatsā* and *śāśvatsā* (see p. 18, lines 6-7; and Note 28). The author of the *Pañjikā* is ignorant about the authorship of the P5 which it considers to have been written in conformity with the teaching of Pāram. In this he simply believed what was given in the first couplet (*Pāramitā* system) of the P5-*vaṇṇa* of the ŚāiP5. This however weakens the testimony of the author of the ŚāiP5-*vaṇṇa* commentary, who considers that Pāram, the younger brother of Pāram, was the author of the P5 (p. 18, line 8).

27. The *ŚāiP5-vaṇṇa*. This commentary has been received in *corrupt MSS*, at least the two we could directly or indirectly use are such (see § 3 c). It is inferior in worth to the *Pañjikā* discussed above. But it has importance in the following points:

² The examples in most *pañjikā* in the passage at p. 18, lines 12-13.

(d) It describes the fatherhood of the PŚ to Pragāḥ, the younger brother of Prāṇi (see p. 28, line 7). The authenticity of this information has been discussed before ([32]).

(e) It defines the Śikṣā as a science for the utterance of (proper) pitch (of vowels) and speech-sounds in general (Śikṣā samuccayasthānam Śāstra, p. 54, line 15). This is different from the definition given in the Pāṇini (see [37]). Apparently slight though this definition is, it is not without importance. In the Pāṇini definition we find speech-sounds only as subject of examination while in the Prāṇi's view (pitch sound) remains. It may be assumed that the two definitions point to two distinct traditions having their origin in two successive stages in study of Vedic Phonetics. That is, speech-sounds came first of all to be studied and the pitch received attention later or at least was treated as a *śikṣā* later (see also [10]).

(f) In the reconstruction of the PŚ, it is this commentary which gives valuable help. Though the MSS. are defective on this point the original meaning of the passage before the name of the Prāṇi can easily be guessed from them (see p. 21, line 18).

(g) This commentary mentions to the Śikṣāśāstra of Śaṅkha the following couplet: *śvara rūpaḥ kṛtsnaḥ mātṛ viśvayathā* [7] *eva eva, mātrāḥ* [Śikṣāśāstra *śikṣāpāṇi* pāṇi pāṇi (p. 58, lines 4-5)].

(h) Of the two available commentaries of the PŚ, the Śikṣā-Pāṇini seems to be the earlier because it is written in a simpler style and has better acquaintance with the old phonetic traditions. The first point will be clear to any one who will compare for himself the language of the two commentaries. And to substantiate the second point we shall refer the treatment of the *Anuvṛtta*. About the exact manner of its pronunciation there is difference of opinion among specialists in the Indo-Aryan languages (see Wadsworth, I. [323-324]). Whitney understands the phonetic value of the *Anuvṛtta* which is nothing but the nasal vowel (T. Pr. 2. 30, JAOB, Vol. 18, p. 129vi);

Mem. Soc. Ind. 2 194 ff. ed. Wadsworth). But Wadsworth and others do not accept this. After a fresh examination of the various Pāṇṇikāya passages together with the opinion of Pā, on this point we find Whitney to be right. The *Anantara* is nothing but a modification of the preceding vowel. The older name of the *Anantara* was *Anantara-Mādhya* or *Anantara-Mādhya*, a post-vocal nasal or a nasal vowel. It has sometimes been called simply *Nāṁ* or *Mādhya* too. That the name *Anantara*, which according to Pāṇi (II.15) means only nasal stops, has been used to indicate nasal vowels for a pretty long time, seems to have been due to a misunderstanding (more about this point in Notes to the Pā).

39. Now the anonymous author of the *Śiṣya-Pāṇṇikā* seems to have been fully aware of the true nature of the *Anantara*. Hence in his comment on Pā. II (Pā. 14-15) he quotes from *Andarāṇi* an entire passage concerning the *Apagatāḥ* as follows:

यदीदृशतः च इति विवर्तितम्, x इति विवर्तयितम्, x इति वसतयेत
च वसतयेत, यदिति, यदीदृशतः ।

This passage occurs in the first Pāṇṇikā of the *Śiṣya* (cf. Ś. Śāstrī, p. 2, ll. 11-12) with the difference that the latter reads *यदीदृशतः* (i.e. *इति वसतयेतम्*, "यदिति"). In view of the fact that the *Śiṣya* mentions *यदीदृशतः* not much later, and *यदीदृशतः* as one of the *Apagatāḥ*, it is evident that the extant *Śiṣya* is corrupt in the passage *यदीदृशतः*. The reading *च वसतयेत यदिति* surely goes to the U-text of the *Andarāṇi*¹ which must have been partially included in his work by the author of the *Yājñika* or the *Śiṣya*.

¹ Both parts of the cited quotation in the *Pāṇṇikā* from *Andarāṇi* are corrupt. (See below.)

² *Andarāṇi* which has been mentioned in the above list of the *Śiṣya* can scarcely be identified. The first Pāṇṇikā which is not treated as an integral part of the *Śiṣya* by the Pā. II was in all likelihood a part of the original work of *Andarāṇi* (see cf. Ś. Śāstrī, *Introduction* p. 54).

(4) Thus it appears that the author of the *Poligita* flourished at a time when the original work of Andarup was still available in a more or less correct form, and in fact he may be older than the *Vishistha* of the *Bhikṣuśāstra*, who appears by no means to be modern. These apart from offering a help in solving certain problems connected with the text of the *PB*. (See Note to the *Śānti-Poligita* for importance as account of the authorship.) It gives about Andarup, who has been mentioned, as far as we know, in four other works:—the *Nāṭyaśāstra* (II 8, 6) and the *Śānti-Poligita* commentary to the *PB* and the *Viṣṇu Bhikṣuśāstra* of the *Śānti Yāgy* (Ind. Stud. IV, pp. 374-380) and the *Bhikṣuśāstra* (8 60).¹

Some of Andarup's passages cited in the *Śānti-Poligita* occur in the *Bhikṣuśāstra* with its text and some occur in a distorted manner and some do not occur. Let us quote them below in a classified manner.

(a) Occurring in full:

1. *सन्तान्तराज्येयिणीं नमो नमः पूर्वपुनः* (ST. 9 14)

2. *सुतं सन्तं सन्तं सन्तं पुनः पुनः सन्तं सन्तं* (ST. 9 11)

3. *सन्तं सन्तं न न सन्तं सन्तं, सन्तं सन्तं सन्तं सन्तं* (ST. 2, 14-15).

(b) Occurring with different readings.

1. *सौ सन्तं सन्तं* (a) ST. 9 5 *सन्तं सन्तं*. The correct reading seems to be *सन्तं सन्तं सौ सन्तं सन्तं सन्तं*.

2. *सन्तं सन्तं सन्तं सन्तं न सन्तं*; *सन्तं सन्तं सन्तं सन्तं*; *सन्तं सन्तं सन्तं सन्तं सन्तं*; *सन्तं सन्तं सन्तं सन्तं सन्तं* (ST. 7 1-2). The ST. reading seems to be correct.

3. *सन्तं सन्तं सन्तं सन्तं सन्तं सन्तं सन्तं सन्तं सन्तं सन्तं* (ST. 7 1-2). The ST. reading seems to be correct.

1. The very fact that the *Poligita* does not quote from any of the late *Śānti* works except the *Nāṭyaśāstra* (II 8 6) probably shows that these late works have not yet been written at the time. From this fact alone we may assume the date of the *Poligita*.

This gives us the upper limit to the *Prakāśa*; the lower limit is to be had from the author's contemporary identity with the commentator of the *Pañcānandashikṣa*. This is 1800 A.D.

43. This commentary (*Prakāśa*) quotes from *Pañcānandashikṣa*, *Nandīya Shikṣa*, *Govindānandashikṣa*, *Śaṅkarabhaṭṭa*, *Pañcānandashikṣa* and *Andarvāṇī*. The only quote taken from the last authority seems to be taken not from any original work of Andarvāṇī but from some author who quoted him. The one with the author of *Pañcānandashikṣa* was different, for he quoted as much as he could (see below). The fact that the *Prakāśa* does not quote any of the late *Shikṣas* except the *Nandīya* and the *Govindānandashikṣa* probably shows that it is not quite modern.

Abstract – The purpose of this study was to determine if there were differences in the prevalence of musculoskeletal disorders between two groups of nurses working in different units of a tertiary care hospital. A cross-sectional study was conducted using a self-administered questionnaire. The prevalence of musculoskeletal disorders was higher among nurses working in the intensive care unit than among those working in the medical-surgical unit.

1. **Introduction**

11. **What are the main components of a business plan?**

18. **Answer: A**—The passage states that the "most common" type of "infectious disease" is "bacterial pneumonia." The passage also states that "bacterial pneumonia" is "the leading cause of death among the elderly."

THE PĀNINIYA-SIKSĀ

With Translation and Notes (Critical and Exegetical)

THE PĀNINĪYA SIKSĀ

WITH TRANSLATIONS AND NOTES (CONTINUED AND REFINISHED)

[a + m] | r k | a k | a m | a m + m + | h |
 m m m m m | p k k k | p k d d d d | m m p d d d |
 k k p k d d d d m m m m | m p + | m p m + | k.]

NOTE 1. The Varga-construction for the so-called *Śiva-sikṣā* whether it was composed by Pīṭha or any of his predecessors was in all likelihood an essential part of the PĀ and constituted its beginning, for pratyaharas like *m*, *yp*, *ṣr*, etc., have been used in that work. But there being no direct evidence about its assumed place in the PĀ, we have put it within square brackets. (For detailed discussion on its age and authorship as well as other points, see Introduction, §§ 15-16)

NOTE 2. The Pā, Pk., Tq. and Rr. recensions begin with the three following couplets:

Adh āgāḥ pāṇinīyāḥ Pāṇinīyaḥ mātṛaḥ pāṇiḥ |
Mātṛaṇīyāḥ tū vāpāḥ pāṇinīyaḥ loka-vāpāḥ || (1)
Prāṇinīyaḥ aḥ lokaṇīyaḥ aṇīyaḥ ālōkīyāḥ |
pāṇī vāpāṇīyāḥ vāpāḥ vāpāṇīyaḥ || (2)
Trī-pāṇī vāpāḥ pāṇī vāpāḥ vāpāḥ vāpāṇīyaḥ || (3)
Prāṇīyaḥ āgāḥ vāpāḥ pāṇīyaḥ pāṇīyaḥ || (4)

Dr. Fox I shall give out the first according to the view of Pīṭha. In possession of the traditional lore, one should learn it with ease and to the people and the Vedic languages. Though words and their meaning are well known, yet those are not within the knowledge of persons intellectually deficient. Hence I shall dwell ever upon the same regarding the pronunciation of words. Their speech-sounds in Pīṭha and Śaṅkha are altogether as arbitrary, according to their choice, has been said by Śaṅkha (Śaṅkhaśikṣā). [1-2]

Notes 3. The order in which the different groups of soundsounds have been mentioned seems to be chiefly arbitrary of notes. The twenty-two words according to the commentators, the *Pañjikā*, and the *Prakāśa* are: a, ā, ī, ū; e, i, ī; o, ū, ō, u, ē, ē, ē; 1, 2, 3, 4; 5, 6; 7, 8; 9, 10; 11, 12; 13, 14; 15, 16; 17, 18; 19, 20; 21, 22.

The earliest concentration of vowels has probably been in the so-called *five-vowels*. But there we have only nine vowels, long and plain ones being altogether omitted. The omission has been discussed before (see Introduction, § 14). The *Prātiśāhikas* are not in agreement with one another as regards the treatment of vowels. The following is a tabular statement of vowels recognized in the extant *Prātiśāhikas* compared with the vowels of the *SB*.

Table 1.
Trends according to the P8 and the P90 thresholds.

¹ The 18th according to the manuscript does not include the place name in the Hupa language, but places the reference to the above. Note G. 127. It is possible that the place name was lost in the translation of this Note.

¹² It is the assumption of a normal W -type long, or W -type I, that the W -type I is not a normal plate, even though the W -type I is not a normal plate. (see L. 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832

^a The concentrations in the TFE do not represent plate counts of 10^6 cells per plate.

¹ This appendix is according to (Gale). For the rest of this appendix, \mathbf{R}^n stands for \mathbf{R}^n above. The last seven chapters of the NTP are genuine. The last (TUE) chapter seems very much to be a late composition (see Hahn, last foot of p. 46). Hence (2) VTY is still unchanged in the first seven chapters, and the chapter VCU will be designed by the same line NTP, and VTY.

² The view of the β as regards the number of words at morpheme level has not passed from its origin which might have been based on arbitrary (i) word type frequency or (ii) The recognition of a long (by the β in column 10) and also a short type by its own class.

not partake of the characteristics of their respective groups in any considerable extent, hence they are to be called the first yama the second yama and so on, making the yamas first in number. But the Hake-pas however thought otherwise and gave an extremely logical interpretation to the definition of the Pētiśākhya without caring for its practical aspect (Whitney has a difficulty over the nature and number of the yamas, see his comments on APr. I 99, TPr. II 81; XXI, 12; XXII, 12. A great deal of his difficulty is due to the peculiar nature of the TPr.) The late Vā. Pr., i.e., the ch. VIII (88), has recognised four yamas only though commonly enough Uvāta explains their number to be twenty. In the Śāntara also (ed. Burnell, p. 7) only four yamas have been recognised. (For more information about yamas see Siddhacharya Varma's 'Yogic Studies', pp. 292.)

NOTE 2. *Anuvāsa*. All the Pētiśākhya except the Śāntara have recognised one anuvāsa only. The Pāṇinī as well as the Prāśāya recognise a reading anuvāsa according to which two anuvāsa are available. In this matter the Pāṇinī involves the authority of Āśādhara. But the recognition of two anuvāsa seems very much to be a late development and did not find favour with the majority of early Vedic phoneticians (Śāntara). It is possibly the author of the apocryphal *tri-ṣṭupāṇi catu-ṣṭupāṇi* etc., that has first honoured the view of Āśādhara in connection with the P.

NOTE 3. *Dakṣaprasa*. The phrase has been called the *dakṣaprasa* or 'sounded-with-difficulty.' This may be one of the reasons why some Pētiśākhya did not recognise this sound (see Table I). But the P. being meant for all the Vedas had to notice this. It should be known that the commentator to the ŚT. recognises this (see ŚTā. Weber was inclined to understand *dakṣaprasa* as a *śrīṅga* Chd. Stud. IV, p. 245). But his view seems to be extensible. The Pāṇinī on the authority of Āśādhara takes it in the sense of *test-aprasa* (p. 17). For according to the latter, *i* partakes of the character of *anuvāsa* which are *test-aprasa* according to P. See also Uvāta on ŚPr. III 2.

*Āśāśa baddhāṇāṁ samādhāyikāṁ māmā yāśāśaṁ vāśāśāṇāṁ ;
māmāḥāṇāṁ baddhāṇāṁ āśāśāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;* (6)

*Āśāśāṇāṁ baddhāṇāṁ māmāḥāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;
pāśāśāṇāṁ baddhāṇāṁ āśāśāṇāṁ māmāḥāṇāṁ vāśāśāṇāṁ ;* (7)

*Āśāśāṇāṁ baddhāṇāṁ māmāḥāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;
māmāḥāṇāṁ baddhāṇāṁ āśāśāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;* (8)

*Āśāśāṇāṁ baddhāṇāṁ māmāḥāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;
māmāḥāṇāṁ baddhāṇāṁ āśāśāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;* (9)

*Āśāśāṇāṁ baddhāṇāṁ māmāḥāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;
māmāḥāṇāṁ baddhāṇāṁ āśāśāṇāṁ pāśāśāṇāṁ vāśāśāṇāṁ ;* (10)

To *Āśāśa* with baddha pervades things and sets the mind to attention of speaking, the mind (*āśāśa*) gives impulse to the fire within the body, and the latter drives the breath out [6].

The breath circulating within the lungs creates the *śāśa* (*māmāḥāṇāṁ*) tone : this is connected with the morning offering (*pāśāśāṇāṁ*) and rises in the Gāyatrī (*vāśāśāṇāṁ*) [7].

(The same breath circulating) in the throat (produces) the middle (*māmāḥāṇāṁ*) tone and relates to the middle offering (*pāśāśāṇāṁ*) and follows the Trīpāṇī (*vāśāśāṇāṁ*); and the skull (*śāśa*) tone (which is produced by the breath circulating) in the roof of the mouth relates to the third (i.e., evening) offering (of the day) and follows the Japam (*vāśāśāṇāṁ*) [8].

(The breath which is thus sent upwards and is checked by the roof of the mouth strikes to the mouth and produces speech-sounds (*śāśāṇāṁ*), which have a double classification—according to their pitch, quantity, place of articulation, the primary effort and the secondary effect. So said those who were versed in (pronouncing) speech-sounds. Learn this carefully [9-10].

NOTE 7. *Puñish-samanyapya*. The *Atiśaya* Bethehouse has the following: *stha mantras lupāḥ tavañt mantras vāc puñish-samāḥ dāpat* (XIV. 6).

NOTE 8. *śamanyapya*. This is a term allowed by Pāṇini, in his grammar, for the *Chandas* only (*śamanyant chandana*, VI. 1. 50). By *Chandas* the grammarian surely meant the Vedic language¹ as opposed to the current language of his time. There is nothing peculiar in his use of the Vedic language in the śloka which is a *Yoga* (see also Notes 9 and 10 below).

NOTE 9. *śi'draśa*. The peculiar sound observable here (*śi*+*śraśa*) has been supported by Pāṇini (*śi'ra lupāḥ śi'draśam*, VI. 1. 124). According to the *Khikā* this *śi* refers to the first of a *śi* (the *śi*-*śa* are *grīṣa*). Hence this also is an indication of the archaic language of the PŚ (see also Notes 8 and 10).

NOTE 10. *Vaṇḍa*, the speech-sound (see Note 11 below).

NOTE 10. *Janapata*. The use of *Janapata* in this verb as opposed to that of *Parameśvata* in PŚ 4 deserves to be noted. But the meaning in both the cases is almost similar.

NOTE 11. *Śvavāḥ*. The word *śvavā* in this place means pitch-sounds, such as *śrīḥ*, *śrīḥ* and *śrīḥ*. The translator of the *Chandas* Upasūtra in the S. D. E. series once translated this word as 'syllable' (I. 6). This is inadvisable.

NOTE 12. *Pravāḥ*. This word means 'primary (pr = forward) effort' (*prāṇ*). Patañjali, however, does not seem to be willing to allow such an interpretation. (see Pāṇini, I. 1. 9, ed. Kaithori, p. 1, pp. 61f.) But as he has objected to it from a different

stand-point we can well have our interpretation. For in articulating speech-sounds, first of all we adjust the different parts of the mouth. This adjustment as opposed to setting the vocal chords in action (which has been termed as *anapavāḥ*) has been

¹ For a modern support see the opinion of Chanda as used by Pāṇini, see Dr. Pan (Thieme's 'Pāṇini and Veda', *Abhandl.*, 1901, especially pp. 177).

fully called *prepetes*. This *prepetes* is included in the *sepa-prepetes* of the *Aspidochrysi* (I. 1. 9). *Sepa* in this work means 'the place of articulation (phthos) in the mouth' (*sepa*). The use of *sepa* instead of *phthos* has been noted for *hepity* (*Alphasy*): probably should always be guarded against in a *phthos*. The *prepetes* in *sepa-prepetes* has been identified with the *Allygenites-prepetes* by *Elapty-dilata* (see *Pagan* I. 1. 9). According to him it is of four kinds: *sepyta*, *sepa-sepyta*, *sepyta* and *sepyta*. As opposed to the *Allygenites-prepetes*, he has *Allypa-prepetes*, which is another name for *Phthos*'s *asapredia*, which according to *Phthos* consists of the following: *sepyta*, *sepyta*, *sepyta*, *sepyta*, *sepyta*, *sepyta*, *sepyta*, *sepyta*, *sepyta* and *sepyta* (see P. I. 1. 9). *Elapty* adds to this three more: *sepyta*, *sepyta* and *sepyta*, and *Elapty* follows the latter in this matter (B. *Phthos*, op. cit., p. 9). The use of two different sets of derivations of the root *se* (such as *sepyta*, *sepyta* and *sepyta*, *sepyta*) in the classification of both kinds of efforts is not happy. Nevertheless it can be justified, for in the case of the *Allygenites-prepetes*, the root *se* relates to space between the two parts of the mouth, which touching or coming very close to each other, produce speech-sounds; while in the case of the *Allypa-prepetes*, it relates to the vocal passage where vocal chords are situated.

The fact that *Phthos* and his successors use *Allygenites*- and *Allypa-prepetes* instead of simple *prepetes* and *asapredia* demands some notice. A change of practice in this matter probably points to the advent of phonetic studies which evidently took place during the time that elapsed between *Pagan* and *Phthos*. Some of the early *Phthos*-works such as the *APs* and *TPs* were written in this period (see Introduction, [26]).

1. *Allypa* and *Allygenites* are simply *asapredia* to *sepyta* and *sepyta* respectively. These *asapredia* however have taken *phthos* and *sepyta* as something other than *sepyta* and *sepyta*, thereby a changed gloss, except into the *Allygenites* as early as *Phthos* (see P. I. 1. 9), who in his *Phthos* (see Introduction) has indicated that in using *sepyta* and *sepyta* (phonetically not *sepyta* and *sepyta*) respectively. The *sepyta* derived in the *asapredia* use of *sepyta* has been derived rather by *Phthos* or any of the *asapredia* *Elapty* or *Elapty-dilata*.

Prakṛitiśāstra very rarely use the terms *pratyāhara* and *anapadyāna*. The APr. never uses *pratyāhara*, but *anapadyāna* is used in 11 cases (I. 12). In the BPr. each of these terms occurs once (XIV. 10; XIII. 1). In the VPr. *pratyāhara* occurs once (I. 48) and *anapadyāna* never. TPr. uses a new word *haraṇa* for *pratyāhara* (II. 33, 34, 45; XXIII. 9) and uses *pratyāhara* once (XVIII. 6, 7), but in the next instance (XXIII. 9) even for it the word *haraṇa-haraṇa* (adjustment of different articulating organs.) Other Prākṛitiśāstra too use the term *haraṇa* (e.g., APr. I. 32; VPr. I. 76; BPr. VI. 3). Whitney's translation of *pratyāhara* simply as 'effect' is vague. Weber's translation of the word as 'Mundbewegung' is however more accurate. *Anapadyāna* is twice used in the TPr. (II. 8; XXIII. 2). The direct action which *pratyāhara* gradually fell down to have caused the substitution of its related sense 'first effort' by the more generalized sense 'effect' which without any adjective did not distinguish between the primary (*śikṣāntara*) and the secondary (*śikṣā*) efforts. An inadequacy and precision of terms is an essential condition in scientific discussion. The post-Pāṇinian phoneticians almost gave up the old terminology and had new terms like *śikṣāntara-pratyāhara* and *śikṣā-pratyāhara* for the simple *pratyāhara* and *anapadyāna* respectively.

NOTE 15. *Anapadyāna*. The term as we have seen above is equivalent to 'after-effort' or 'secondary effort', which means vibrating or humming of vocal chords. Whitney translates this as 'cessation' (APr. I. 42; TPr. XXIII. 2) and Weber has rendered it by 'Anstosung' (Ind. Stud. IV, p. 107). Dr. Siddheshwar Varma translates this as 'musical-material', or 'harsh-voice material' (op. cit., pp. 2, 6), but such translations though not altogether incorrect are not happy. Whitney, Weber and Varma all seem to have missed the etymological implication of the word. The author of the *Śikṣā-prakāśa* however extends the meaning of *anapadyāna* which according to him includes *anadyāna* too (p. 46). This original observation seems to have originated from the separate mention of *anadyāna* in Pd. 17b. (For other points regarding this word see above the Note 12 on *pratyāhara*).

NOTE 14. *Tu sama-siljät pöytä.* So and those who were versed in the use of (pronouncing) the speech-sounds. This evidently shows that there were other masters of phonetics (Siljämest) before Pitkan wrote his *Siljt*. This headship does not appear in the A.P. It is possible like the Pö 14 it has been left out (see Note 28 below). *Farna* also means a 'written sign' representing a speech-sound (see Th. Goldstucker, 'Finn: his place in Sikh literature', London, 1862, pp. 346).

The theory of pronouncing speech-sounds as given here recognizes three principal places of articulation: throat (siljät), throat (siljämest) and the roof of the mouth (siljät). Pitkan too while explaining *siljät*, *siljämest*, etc., interprets *siljät* *siljämest* as *tu sama-siljät*, *siljämest* as *tu sama-siljämest*. (cf. Eklund, Vol. I, p. 4).

From the double division of speech-sounds mentioned in the Pö. 7 we may well expect that each class of sounds will be discussed next one after another. But authors of the related versions such as Sk., Yq., Pö and Pk. remain without paying any heed to this fact here interspersed passages (breaking the divisions) with examples from different sources.

Udalla siljämest on vartal on maala lajaj:

Arvo siljämest siljät siljämest on siljät (II)

Tr. There are three kinds of (siljät) sound: udalla, vartal, and maala. Among vowels short, long and phrasal vowels are distinguished by their time (of articulation) (II).

NOTE 15. *Arvo* the meaning vowel is a prototypical of *Finn*. The Yq. version made Pö 8 as its Skd. couplet.

NOTE 16. The Pk., Yq. and Sk. versions read the following couplet in the 11th, the 16th and the 26th respectively —

Udalla siljämest on vartal on maala lajaj:

Arvo siljämest siljät siljämest on siljät (IV)

Tr. Of the three named vowel sounds and phrasal vowels are seen in the high pitch (siljät), phrasal and vowels in the low pitch (maala), while

in the instrumental plural [understood]. This difficulty was felt by some redactor who changed the expression to *anubhūtaś cāpi*. But the genuine original reading might well have been **anubhūtaśchit ca*, and the late redactor probably finding this Chândogya form unexplainable by the grammar of the classical Śākhya, which is thought to have been the language of the Pth, changed it to *anubhūtaśchit ca* and brought it within the control of the ordinary grammar, though the new difficulty which arose escaped his notice. The redactor of *anubhūtaś cāpi* made it foolish and removed all trace of the assumed original.

Kṛtāpāte śāte i-a-pāte śātepī cyāpāte va-pā :
apā anubhūtepī p-pa-m-pā śātepī i-a-śā-śāte anubhūte : (17)

Aśā-māte te kṛt-pāte śātepīpāte vaśāte śāteśā :
i-a te śāte-śātepī i-a śāteśāteśāte anubhūte : (18)

Aśā-māte te śātepāte śāteśāteśāte śāte :
śāteśāteśāte anubhūte apā vaśāte-anubhūte : (19)

Tr. *k* and *h* are throat sounds; *i*, *a*, *ū*, *e*, *ā*, *i*, *j*, *h* and *ś* and *t* are palatale; *m* and *va* *ś* *a*, *p*, *ph*, *b*, *bh* and *m* labiale; *r*, *ṛ*, *ṣ* *a*, *ṣ*, *ṣ*, *ṣ*, *ṣ* and *c* and *s* dentale, and *l*, *ṛ*, *ṣ* *a*, *ṣ*, *ṣ*, *ṣ*, *ṣ* and *n* and *v* are dentale [17].

Tr. *ṣ*, *ṣ*, *ṣ*, *ṣ*, *ṣ*, *ṣ* and *ś* is uttered from the root of the tongue, and *v* is a dent-labial sound; *m* and *n* are throat-palatale, and *a* and *va* are throat-labial sounds [18].

The throat element of *i* and *a* is half a mātṛā and of *ū* and *ṛ* is (one) mātṛā; these two latter (i.e., *ū* and *ṛ*) are open-close sounds (i.e., their first half or the *a*-element is open and the second half or *i* and *u*-element is close) [19].

NOTE II. At the time of the PthŚākhya the speech-sounds of the Old Indo-Aryans did not all retain the places of articulation which they had at the time of Pthini.

Plots of articulation for speakers of the GHA are given in the PG and the PPH columns.

[illegible][illegible]

For details of this variation see the Table II in which views of Proto-Akkyan have been compared with that of the PB.

Among these, typical is the case of *r* and *r*. According to the Proto-Akkyan the first is velar, while they are not unanimous about *r*. But Pigeon considers *r* to be cerebral (Schubert-Vosma, op. cit., pp. 6-7). The fact that *r* and *r* coexist, according to Pigeon (VIII: 41) as well as the Proto-Akkyan (SPr. V: 13, 56; VPr. III: 65; TPr. XIII: 6-7), the dental sounds that follow them, shows that these sounds were originally cerebral, and Pigeon returns to the original state rather than the Proto-Akkyan which have *r* as a dental or an alveolar sound.

Note 18. *Ca*. It indicates *c*, *ch*, *j*, *h* and *f*. Appending *s* to the first sound of the groups (except) of stop consonants for indicating all the five members is a Pigeon device used in the Akkadyan (*trachi maramaya adstapach*, L. I: 89). *Pa*, *fa*, *ts* and *ss* have been similarly used.

Note 23. *Archa-malid ts*, etc. This couplet (PB: 12) has suffered very badly in transmission, and its second half does not occur in the AP. Urala in his comments on the VTr. I: 73, has wrongly quoted its first half as archamalit ts *archatay* *adstapach*. It appears that the *a a d b y a k q a r a s* (*dyphthong*) + *ad* + having lost their dyphthongal character in later times¹ this couplet became unintelligible and gave rise to variants of perplexing nature. Weber's reading *archatayadstapach* spoils the metre, but his conjectured emendation (*ts trachit*) of *archatay* was a very happy suggestion and finds actual support from the Pulpit (p. 12). His reading *malid* + *ad* for *malid ts* + *archatay* however cannot be accepted, for it has evidently arisen due to a misunderstanding.

¹ It is on the basis of Pigeon's use of *dyphthongs* in *ts* and *trachi* under the assumption that "it is understood that the Akkadyan possesses the five *ts* and the five *trachi* groups the Akkadyan..." (p. 41, p. 129). The PB, however, is substituted by the 'Akkadyan' in this context.

² See Note 1, p. 73.

All the *maligysyruks*² being long, consist of two syllable (APr. I. 18, VPr. I. 17, TPr. I. 35, APr. I. 63). Hence from Pö. 18 we have the quantitative distribution of the two elements of *s*, *o* and *u*, as follows:

in <i>s</i> (< <i>s</i> + <i>i</i>)	<i>s</i> is $\frac{1}{2}$ 'short' and <i>i</i> is $\frac{1}{2}$ 'short'
" <i>s</i> (< <i>s</i> + <i>u</i>)	<i>s</i> is $\frac{1}{2}$ " " <i>u</i> is $\frac{1}{2}$ " "
" <i>o</i> (< <i>o</i> + <i>i</i>)	<i>o</i> is $\frac{1}{2}$ " " <i>i</i> is $\frac{1}{2}$ " "
" <i>o</i> (< <i>o</i> + <i>u</i>)	<i>o</i> is $\frac{1}{2}$ " " <i>u</i> is $\frac{1}{2}$ " "

Note 34. The 34. recension reads the following couplet after Pö. 18. This does not occur in the APr. and VPr. recensions, and none of the two commentators comment on it. Hence *u*₂ have considered it to be spurious:

Saperkus maligysyruks, vintaps te drimdrimok ;
plaps ot vaperys vort, aploks vortok vortok (Pö.)

In A couplet (lines) would be one-syllable long, and *v* vortok (poet) would be two-syllable long, which would not be acceptable while Swedish verse was iambic (Pö.).

This couplet like other spurious couplets discussed above must be a borrowing from some unknown source. But the equivalence of the second half of the couplet occurs in the TPr. (poet) couplet which (single, single) (Pö. 4-5).

² Wästermark (2. 186), has not observed that all *s* and *i* in (34) were originally *maligysyruks*, i.e., combinations of two vowel sounds. His objection is founded on *s* and *i* occurring not at initial position (34). But the TPr. phonetician is using the term *maligysyruks* precisely the same because *maligysyruks* character of *s* and *i* such as appears in *dr*, *qu* (34, 35) and *dr* *qu* (34, 36), as well as *s* and *i* appearing here a combination of *s* and *i* and *u* respectively.

³ The VPr. (2. 75) only among all the Finnic languages expressly compares the fact that *u*₂ and *u*₁ have one another as *u* and *u* called for *u* as well as *u*. From the Swedish as to the production of *u* and *u* given in the APr. (2. 12-13) appears that the latter *u* has appeared in the Pö. But as regards the pronunciation of *u* and *i* the APr. expressly says that they have only one place of articulation (2. 49) and hence the fact is understood that in the time which Finnic languages and *u* no longer retained the trace of their light-syllable character which we meet in the Pö. 18. The VPr. is silent about the production of *u* and *i*. The APr. in its attempt to describe their nature simply compares the same (see 2. 12-13). Hence it appears that the Finnic languages in question are lower than the Pö.

Here (2) then occurs the following couplet in the 33rd and 34th Tapes respectively and which has remained until the Festschrift commentary: Not as it appears understood in the present context and contains the term *hōryō* which as we have seen, before in a form of *hōryō-jūin* that Pōpō (see Note 22) we have considered this couplet to be spurious.

Ständes Götterdenkmal eines römischen Heeres: Legionärsmantel aus Tillyards eines Soldaten aus Tillyards, ca. 1900.

The Yards and adjacent area open to reconstruction, a need to get more water than there used to be and use the old more so (201)

Form 28. The couplet like other spurious ones must be a borrowing from some unknown source. The substance of the first half of the couplet is available in the *Atti di complice* written in accordance with I. 24. 119. But according to the Folklidhaga, not only is *2* but also the main spurious *folklidhaga* workhorse, *lata/gylfahaga* I. 24. 119 and not *1*, as in the present couplet.

Avar-ira-gamaliq on aladil rihlon ayar :
 qadimlariq bir qatir qadimlariq :
 amallari qadimlariq qadimlariq qadimlariq : 100

Tr. *Asperites* and *yumas* have the same for their place (of articulation), apodemes (for *Asperites*), *Asperites* (for *yumas*), *Asperites* (for *yumas*) as well as *Asperites* (for the *Asperites* and *yumas*) are apodemes and as such they share the place of articulation of sounds on which they are dependent (202).

Here M_6 , the hexamethylsilsesquioxane, does not occur in the T_0 and the AP reactions (see Introduction § 2). As acetone and water have been mentioned earlier in the PS (1.6) we have to consider this as belonging to the original part.

NOTE 11. *Amstrak*. The 'amstrak-amstrak' and 'amstrak-amstrak' seems to have been synonymous and probably the original name for amstrak by which the TPr. (I, 56; II, 56; XVII, 5) understood only a nasal vowel. This meaning of the term was known to the author of Polžik too. For he says: *amstrak* was blamž tŕ amstrak, 'so it means after the vowel it is (called) the amstrak' (II).

The term *nasalno-sloznye* has sometimes been shortened also simply to *sloznye* or *slozila*. But this shortening seems to have created some misunderstanding. For example, in the APr. (I 34)¹ and in the RPr. (I 90) *sloznye* has been used to denote words pronounced directly from the nose (i.e. yams and the nasals?) as opposed to *nasalnoye* (nasal sloznye?) which are pronounced in the mouth as well as in the nose (APr. I 37 and R. I. I. 8). But in spite of such an use of *sloznye* some interpretations and commentaries of the Prāṣṇāḥya have taken *nasalno* and *sloznye*² to be two different words (VPr. VIII³ 58, 27, 29, Uraja on VPr. I. 74, Māhārāja on TPr. I. 13). But curiously enough in his commentary to the RPr. I. 23, Uraja has explained *sloznye* as the term including yams and the nasals as well as *sloznye*⁴. Though the later writers on Yedic phonetics at times differed from him about the meaning of the term *nasalno*, Pāṇini understood by this a combined sense. For he explains the *nasalno* as a nasal sound (Pā. 14) and gives directions as to how it should be correctly produced (Pā. 134-135). The term 'nasils' which is used to denote a combined nasal in the Prāṣṇāḥya has also been used in the Pā. (144). Among the various philologists a controversy went on for some time about the correct pronunciation of *nasalno*; but

¹ The APr. never uses the term *nasalno*. It is from the commentators that we learn that the sloznye correspond to yams and nasals like Whitney on APr. I. 34.

² Whether under term of Prāṣṇāḥya. In Uraja I. I. 8, he says after making preliminary explanation 'nasalno-sloznye' should simply represent *nasalno-sloznye* but examples *nasils* perhaps point to *nasils* as the Nasils. Ibid. I. p. 85.

³ The VPr. sometimes takes *sloznye* in the sense of yams alone (III 32, 34).

⁴ The term *nasalno-sloznye* is explained as a combined nasal apparently from a misreading of the word with a *nasalno*-sloznye combined term *nasils* (or *nasils* as used in the Mahābhāṣya, prāṣṇāḥya both present), *slozila* *gagha* (cf. Whitney, I. p. 27, line 18-19). Prāṣṇāḥya is clearly against such a view (see line 8 above). Among the old authorities also none at least is clearly *nasalno* with a nasal word in APr. (I 35) but the relevant item has probably been corrupt. TPr. also understands by *nasalno* nasal alone not *nasalno* (II, 34, line 14; III 137, 138.2 1.31, 32, 33, TPr. V 24-25, 32; 3. 1333, 137.1; 3. 1334-34).

⁵ Whether *nasils* (the chapter of the VPr. on a later edition, loc. cit. p. 27).

⁶ As in *slozils*? or again *slozils* the *slozils* (prāṣṇāḥya) (cf. Whitney, I. 194).

among them all Whitney, in spite of the bewildering opinions of the *Prattikāya* or rather the accumulation of such works, could correctly guess the true pronunciation (on TPp II, 30). Winternagel however considered him to be mistaken¹ and Thumb² did not venture to give any opinion on the matter.

NOTE 26. *Spandhagatya* used as an. This Sanskrit does not occur in the Bk and AP. recensions. Still, *spandhagatya* and *viṅga* being mentioned in the Pk, 2,³ we can reasonably expect the treatment of their mode of articulation in the Śikṣā. Hence we have considered this Sanskrit as a genuine part of the Pk (see Introduction, § 35). One of the reasons why it came to be ignored in the Bk recension is probably to be sought in the varying later use of the term *ḥrasva* which in this context really means *viṅga*⁴ or the final aspiration provided by a vowel (-4). This term meaning *viṅga* as well as final *h* occurs in the Bk Pr (I, 22; II, 4). In the VPp (I, 64), the APp (I, 30), the Kāśikā (18) as well as in some other part of the BPr (I, 13) the term *ḥrasva* has been used to indicate aspirated stops. It seems that by the earlier *śikṣā* *viṅga*, as well as aspirated stops, due to their almost similar nature, was included in the term *ḥrasva*. Pāṇini, however, does not use this term because in his grammar, his *pratyāhara* evidently served the purpose. By this term the TPp however means *ā*, *ṛ*, *ṅ*, *ḥ*, *ḥ*, *ḥ* and *ḥ* (I, 8), and curiously enough the BPr also means by the term same sounds in I, 13, and in the Chapter VIII (considered to be a late addition by Weber) of the VPp we understand by the term *ā*, *ṛ*, *ṅ* and *ḥ* (cf. II, 24, Weber).

NOTE 27. *Apasara*. This term has been variously explained, and Weber held a difficulty over its correct interpretation.

¹ *Akṣarāṇi Sanskrita*, Vol. I, § 333, p. 337. In his opinion of *Prat* Edition the recension of the BPr is right but a vowel vowel (see Dr. Tyler-Gibbs, p. 17).

² *Handbuch der Indologie*, I, 36.

³ This script occurs in all the recensions of the Pk and must have formed a part of the original text.

⁴ Weber, *Ind. Stud.*, IV, pp. 146-148, also VII, p. 106.

NOTE 31 From this passage we derive a hint about an alternative pronunciation which the scribes had before them. The alternative pronunciation has been provided for by Pisch in his grammar (*manuscripta sunt personarum*, vs *paṭṭakara* VIII. 4. 28, 29) and it is equivalent to the pronunciation of what according to Prof. B. K. Chatterji is a 'reduced' nasal occurring also in the late Middle Indo-Aryan (cp. *ib.*, p. 263).

NOTE 32 *Ṇipīṇaḥ* 'danta-sūṇya' should be taken as *ṇipīṇaḥ + adanta-sūṇya*.

NOTE 33 The next couplet occurs in the Bb recension only.

Ḍavāṇaḥ śūṇyaḥ in *śūṇya śūṇya-ḍavāḥ* ;

ḍavā śūṇya in *śūṇyāṭīṭī pūṇyāṭī-śūṇyāṭī* : (Bc)

Tr. In the scribes, *ḍavāḥ* *śūṇyaḥ* and *śūṇya-ḍavāḥ* the two *ḥ*s should be separated so that in case of an end : (Bc)

NOTE 34 This couplet has been taken from the Lemaist A. (II) 9, where it is fully correct. The reading elsewhere in the Bb recension is evidently corrupt. Due to this corrupt reading Weber had a difficulty over the passage (cp. *ib.* p. 144). The following couplet occurs next in the Bb recension. In the Yq. it is no 30. The *Pratibha* commentary on it through the *Paṭipā* passes over it, and some versions of *AP* does not have it.

Paṭipāṭi paṭi-karoti-paṭiḥ śūṇyāṭīṭīṇaḥ in *on paṭipāṭi* ;

śūṇyāṭīṭīṇaḥ *paṭipāṭīṇaḥ* *śūṇyāṭīṇaḥ* *paṭipāṭīṇaḥ* : (Bc)

Tr. As the *ḥ* occurs but once between two *paṭi* all both taking care but they should either be dropped or taken : we should see pronounce the *ṇaṭi* again sounds but they should be dropped (it is stated) or differentiated (it is pronounced) (Bc).

There is pain in the words *paṭiḥ* and *ṇaṭi*. The fact that the couplet mentions the dropping of *ṇaṭi* in the *ṇaṭi* conclusion shows that the upper limit to the date of the composition of the couplet is c. 100 B.C. when the

1. 'The scribes followed by commentators after this (i, ii) a and b exchanged in the couplet the sequence must surely of the following : *paṭi-ṇaṭi* the possible *śūṇyāṭīṇaṭi* in the other case are *ṇaṭi*, *ṇaṭi* and *ṇaṭi*. This is in special when the scribes stand at the end of a work.'

Hydypid vñhōp hūghōm hūghōpōm vñmānānōm ;
vñhōmōm mō dōm-mānōm mō pūghōmōd' dōm vñhōmōm § (28)

Tr. In the head of a sheep there should be one snout and half a snout in the roof of the mouth and another half in the snout. There are two snouts of a sheep snout [28].¹

A snout would still be seen (at existing as) the head for sheep has a snout like that of the belkōmōl (camel) (and it had a snout and in fact in this line). The example is explained § [28].²

Kūdhōp mō hūghōpōm hūghōpōm vñhōmōm vñmōm mōmōm ;
vñmōpōm hūghōpōm hūghōpōm vñhōmōm vñhōmōmōm § (29)

Tr. The hump should be made in the middle and its two sides should be made equal and the hump should be accompanied by a snout. The example is relative [29].

Notes? The meaning of the passage is not clear. The couplet apparently only is the 24 revision and not being interpreted with complete truth as independently genuine we have considered it spurious. Thus, like other spurious passages, occur probably in connection and yet brought to light.

Notes. Next occurs the following couplet which has not been transmitted as is the Panjāb though other versions include it

Bām vñmōd' pūghōmōmōd' vñhōmōd' mō mō pūghōmōd' ;
vñmōpōm-vñmōpōpōmōm vñhōmōmōmōm mōmōmōm § (31)

Tr. The speech sounds should be pronounced like this. On strong there is the proper manner one obtains division in the world of Belkōmōl [31].

Notes. The couplet occurs in the *Shāh* § (21 & 24) and also in the *Khāṣṣ* § (34) and might have originally belonged to any of these works. It does not fit in with those versions of the *IT* which occur in all versions and are undoubtedly genuine.

¹ With the above couplet may be compared the *Levāl* § 17. The passage seems to be wrong.

² The couplet occurs in the *Shāh* § (21 & 24) with some variations. In the *Khāṣṣ* § (34) the couplet is a couplet form. What we in the text reading of the couplet is in fact the 24 in the couplet form (it not certain is).

Note 10. In the Tq. version the above couplet is succeeded by the following one:

Akhalakhe dāṭhāi vāṭhāi pāpāpāṭhāi kṛā madhāpāṭhāi :
āpāṭhāi apāṭhāṭhāi kṛāpāṭhāi āpāṭhāi māṭhāṭhāi : (30a)

Tr. In measuring the Yaks we should make an ending quat but in applying the same to clouds the relation should be of another quat while at the time of contracting people the Yaks perhaps should be ended shortly (31a)

Note 11. This couplet occurs in the Mar. B. (I, 6, 11) and Tr. B. (34) but in a slightly different form it occurs also in the Hindi B. (9). It seems that the couplet occurred originally in the Mar. B.

Note 12. The next six couplets occur in the Mar. version only. They are being taken up orally.

Gāṭh āpāṭh āpāṭhāpāṭhāi kṛā kṛāpāṭhāi pāpāṭhāi :
āpāṭhāpāṭhāi Tṛā-pāṭhāi āṭh āṭh āpāṭhāi kṛāpāṭhāi : (32)
Māṭhāpāṭhāi āpāṭhāi-pāṭhāi pāpāṭhāi kṛā āpāṭhāi :
āpāṭhāi āpāṭhāi-pāṭhāi āṭh āṭh āpāṭhāi pāpāṭhāi : (33)

Tr. These show that the Yaks in a changing manner, find quality, with a swelling of the heart, are a version that at the time of creation do not know the meaning of pre-occupied and have a few more, are one kind of bad version. Sometimes decrease, expansion of words, right amount, patience and slowly to observe time are six months or a year (32, 33).

Note 13. These two couplets occur in the Tr. B. (39, 40) and seem to have appeared there for the first time.

Āpāṭhāi āpāṭhāi āpāṭhāi āpāṭhāi āpāṭhāi āpāṭhāi :
āpāṭhāi āpāṭhāi āpāṭhāi āpāṭhāi āpāṭhāi āpāṭhāi : (34)

Note 14. In the Mar. B. (I, 6, 11, 12) the couplet together with another constitutes the lastest couplet of the Yaks chant. A translation of the two couplets are given below.

Sighs, fear, various troubles, infatuation under confusion represent love, under motherhood, non-observance of the planned relationship (in general) and (personal) amount (34), and

business, growing or the separation, between word: means love business, want of the relationship: there are the lastest couplet in the Yaks chant.

Note 41a. These two couplets occur also in the Tr. 8 (28-29) but they relate there to faults of recitation (*parivāḍya*) instead of the faults in chant (*śloka*) of the Man. 8. But as the couplets in this latter work have been provided by the expression, the rest of the śloka they are usually quoted there does seem rather weak. It is probable that the couplets in question occurred in the Tr. 8 first.

Uṣṇasā dāṣṭya dāṣṭyaṁ vāṣṭyaṁ

śāṇḍhīṣa pūṣṭhīṣa pūṣṭhīṣa :

vāṣṭhīṣa pūṣṭhīṣa-pūṣṭhīṣa ca

śāṇḍhī ca śāṇḍhī ca ca śāṇḍhīṣaṁ : (35)

Prithā pāṭha vāṣṭha vāṣṭha-śāṇḍhī

śāṇḍhī śāṇḍhī-vāṣṭhīṣaṁ :

vāṣṭhīṣa-śāṇḍhī śāṇḍhī-pāṭha śāṇḍhī

śāṇḍhī-śāṇḍhīṣa-śāṇḍhīṣaṁ : (36)

Thāṣṭha vāṣṭhī vāṣṭha vāṣṭhī

śāṇḍhī-śāṇḍhīṣa ca ca vāṣṭhīṣaṁ :

vāṣṭhī-śāṇḍhīṣa-śāṇḍhīṣa-śāṇḍhīṣaṁ

vāṣṭhīṣa vāṣṭhīṣa-śāṇḍhīṣaṁ : (37)

2b. One should utter with a Vedic passage or under verse, between one's words, quickly, haltingly, slowly, with a longer voice, in a long long manner, with repeated voice, halting (occasionally) words and syllables and in a plaintive voice [34].

In the morning (the Vedic student) should read (mantra) with a voice from the chest, which should be (as deep-toned) as the growl of a tiger. In the middle he should read it with voice from his throat, which should be like that of a crocodile. In the third session (for the evening offering) he should recite it in the highest pitch, from the roof of his mouth and his voice should be like that of a peacock: *gāṇa* or *śāṇḍhī* [38-39].

Note 41b. These couplets occur also in the Man. 8. (31-32) but we do not now whether they originally belonged to this work.

śāṇḍhīṣa pūṣṭhīṣa ca vāṣṭhīṣa-śāṇḍhīṣa śāṇḍhīṣa :

śāṇḍhīṣa pūṣṭhīṣa pūṣṭhīṣa vāṣṭhīṣa-pūṣṭhīṣa : (38)

Tr. The vowels are without touch, semi-vowels slightly touched, *i*, *e* and *a* are half-touched sounds, and the remaining consonants are touched (i.e. stops) [36]

NOTE 42 The degree of touch in this connection is with regard to the cavity of the mouth or rather the space between the two parts of the mouth which touch or approach each other before specific-sounds are produced

Samu' amantak' adino midim ha-giyah' ayitit;
tan-ahle pan-patit' or tan-ahle ha-bhe-pli-diyot;
lpa-shatit' are yelot' ge-dim-shet pan-patit;

Tr. *Sam* (*s*, *a*, *h*, *n*, *a*, *n*, *a*, and *t*) are produced through nose, and *h* except when it is combined with *r*; and *plak* (*p*, *r*, *g*, *h*, *p*, *h*, *h*, *h*, *h*) are voiced, semi-voiced (*r*, *a*, *i*, *e*) and *pat* (*p*, *r*, *h*, *g*, *d*, *d*) slightly voiced, the group beginning with *h* and *ph* (*r*, *h*, *h*, *h*, *h*, *h* and *ph*) (*r*, *h*, *h*, *h*, *h* and *ph*) breathless, or (*r*, *e*, *h*, *a*, *h*, *a*, *h*) slightly breathless. This has been called the basis of speech [29-31a].

NOTE 43 The *h*-vowels *he* seems to have created difficulty from very early times. The *Pešika* (15) explains the passage first with the reading *he* and this seems to be the right reading. The second reading discussed as it could not have been original in spite of its quoting *Seenuk's* *Se-Pešika* *he*.

NOTE 44 In the *Amoghmandit*, §, 40, we have *haher* *repharapayra* *ahle* *haher* *ahiyot*. *h* combined with *r* is always as a voiced sound. The true nature of the voice has not been marked by the author of the *Pešika*. *he* seems to have been misled by a wrong application of the testimony of the *Amoghmandit* §.

NOTE 45 The terms *ahle*, *repharapayra*, *ahle*, *repharapayra* stand for voiced aspirate, voiced non-aspirated, unvoiced aspirate, unvoiced non-aspirated respectively. The term *repharapayra*

probably more having *doke* as well as *sido* or *shapdo* etc., *tsan-shiknaka*. Hence in the BPr (XII 2) we have *tsan* like *doke*, *sido* and *tsan-sido*. The TPr (II 2) however uses *shiknaka* in case of *ko-kira* and seems to describe it as a usual midway between raised and unraised (II 4) and at the same time with it raised (I 18).

Part (b). The following couplet occurs in the *Eng. version*, (11). The *lit. version* gives only the first half of it:

Abstract: Patient participation requires that the patient is involved in decisions about his or her care. Patients' participation in decisions about their care is an important part of patient care. Patients' participation in decisions about their care is an important part of patient care. Patients' participation in decisions about their care is an important part of patient care.

Tr. By Poem, the son of [Ding], who has personified in the world the source which it is as it was a part, has also personified it in the world (See the first line) [all 40%]

[illegible]

Item 49 The following are complete cases in the *Tit* dataset. select

Chondrichthyes fishes do not have keratinized scales, but the poikilothermic reptiles, snakes, and lizards have scales that are made of keratin (41).
 All the phyla of the subphylum Vertebrata have keratinized scales, but the cartilaginous fishes do not have keratinized scales (42).

To (Four) *Makura* which is the two legs (of the Wife) is read and then the *Kajiki* which is the two hands. The Essence of the Movement of Intimacy (*Matsunaghi*) is to open and the *Sarukiri* is called its reverse, the filth is the root of the Yoko, and *Onsenmaru* is the mouth. It is for this reason that one stepping the Yoko with all six hands is necessary (shōshi) without a substitution in the order of *Yoshimaru*. [42-43]

amāhita kṛtā śloka mādhyama vāhita vāhitaḥ ;
māhitaḥ kṛtā-mādhyamā, vāhitaḥ pṛthak-māhitaḥ ; (49)

Tr. *Amāhita* is to be known as the short (or least), *vāhita* as the great of the two, and *pṛthak* as the other middle.

Notes. This passage has not been traced in any of the available *Sūtras*. Perhaps it has been taken from some *Ś*, which has not yet come to light [50].

Ślokaḥ kṛtā mādhyama kṛtā-mādhyamaḥ ;
ślokaḥ kṛtā kṛtā-mādhyamaḥ ; (50)

Tr. The *śloka* given and one more and the other two middle, the greater than middle and the smallest only half of a meter. [51]

Notes. Here *śloka*. This passage occurs in the *Loṇaś* *Ś* (7111-12), the *Śū* (XIII 10) and with slight variation in the *Ts. Ś* (2614) and in the *Mād* *Ś* (122). But it seems to have occurred first in some of these *Śloka* and not in the *Pā*.

Notes. The following two couplets occur in the *śP*, *śā* and *Yaj*, sometimes, and the *Śāhita* occurs in them.

Śāhitaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ;
śā ślokaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ; (52)
Śāhitaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ;
śā ślokaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ; (53)

Tr. In the repetition of that which has come from a half *śloka*, that which is indicated (or least) *ślokaḥ* from the *śāhita* text there is no inference from its descent or from the *śāhita* text. [54].

But in repeating with good enough and some (or middle) that which has come from a good *śloka*, and is divided, from the good text and is well established, the *śāhita* comes [55].

Notes. These two couplets occur in the *śā* *Ś* (11 & 12, 13) and the *śāhita* *Ś* (122, 123). It seems that they occurred for the first time in the *śā* *Ś*.

Notes. In the *Yaj* and *śP* sometimes the following couplets come after the passage given above.

śā ślokaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ;
śāhitaḥ ślokaḥ ślokaḥ ślokaḥ ślokaḥ ; (54a)

Naikara naika go'dhila mura-marahtha-angapala :

Ep-Vajra-Samudhāh gata bhakṣa-lāla mahāgata : (53)

Tr. It eagerly reads (the Veda) without a show of hands and does not observe proper accents and places of articulation (ṛk, Tājya and Śānta have been and he thinks) he claims solely as an intimate animal (54)

And a person who reads the Veda with a show of hands, observes proper accent and places of articulation and knows the meaning of what he reads is purified by the Ṛk, Tājya and the Śānta and is placed high in the realm of Brahman (55)

Note 53. These two couplets with slight variation occur in the Tr. A. (40-41) and the Mūl. B. (91-92, 10-64). It is possible that the Ṛk version has adopted them from any of these.

Note 55. The two following couplets occur in the Tr., and the Ṛk version has been commented on by the Pāṇinī and the Prabhā.

Samāharaḥ śāntarthaḥ pāṭhāt Dāhā-gaṇāya dhātavā :

śāntapāṭhāpā mahāgata darśita dhātavā dhātavā : (56)

Yatāpāra-mahāgataḥ śāntapāṭhāya Mahāgata :

śāntapāṭhāya pāṭhāya darśita Mahāgata mahāgata : (57)

Tr. Drawing the dhātavā words from the gāthā domain of speech (pāṭhāya) Naikara goes (Pa, he releases (Pāṭhāya) to the realm of Dāhā. This is a loss (56).

Message is that Pāṇini who having received the traditional lore of speech-accent (Vajra-mahāgata) from Śānta has told us the nature (gāthā) (57).

Note 56. These two couplets do not occur in the Tr. 46 and 47 is missing in the Tr. It is the relationship of the so called Śāntartha, which is clearly mentioned in them, that is a great divergence of opinion. But it is possible that even if Pāṇini was not their author he was at least responsible for their present form (for details see Introduction, 11, 12-13).

Note 57. The two following couplets occur in the Tr. mentioned only

Yata dhātavā gāthā pāṭhāya darśita śānta-mahāgata :

śānta dhātavāya śāntapāṭhāya darśita Mahāgata mahāgata : (58)

Apāṭhāpāṭhāya śāntapāṭhāya darśita Mahāgata :

śāntapāṭhāya gāthā darśita Mahāgata mahāgata : (59)

To. Banage to that *Phon* who has snatched off the human speech with pure water of words and has played through the ghost of ignorance [40]

Banage to *Fagan* who has opened with the vulgarism, point of knowledge the eyes of people blind with ignorance [40]

NOTE 111. These two metaphors have not been traced in any available book, but the second one cannot very much be an adaptation of the opening lines of a much very old treatise called the *Chuang-tzu*. In the latter work we have the passage for *Phonage*.

NOTE 112. The most accepted version in the *Yi*, and the *Shi* pronounce and both the manuscripts have repeated it. But *HP* does not contain it.

Transcendental-suffering (only)

as the perfect propitiation with deity;

as liberate pain-pain-irritation

misdeeds, sinners as conductors devils drifts; [100]

To. Then, among the twelve hours who always devotedly read the (word) which has come out of the mouth of *Shen* (the omnipotent one) obtains cattle, property, hope and will attain happiness in heaven [101]

NOTE 113. This couplet again unifies the whole work to *Shen*, though from some of the previous couplets we have, already learnt that. But also that that this work goes in the name of *Fagan* and not in that of *Shen*—one which one it would have had a name like the *Shen* or *Shen* (Shen) seems to give strong grounds for considering this story as an apocryphal one.

		33	after the fullstop	.. read :

In his commentary to the T₂ (Barua, Barua, 1930) Pandit Kripinid Mishra thinks that Sk 30, 37, 43, 54 and 55 are spurious (p. 32), while another recent editor Pandit Radhapanid Ghosh in his commentary to the same work (Chovvibhaskar, Barua, 1937) considers Sk 23, 33, 34, 44, 54 and 55 to be spurious (see his comments on them)

Page 52 Line 14 after pp 99 f. read See also Trigault,
p. 5 and Miura,
pp 28 f

65 last line after to PS read:

Trigault suggests that *shuk-spreksh* and not *shuk-spreksh* is the correct reading and quotes the *Yanqueche-protipaka* (18) to support this view (pp. 8 f.). Giesse contradicts him and considers the reading of the passage as the printed text (in the SS.) of the work to be defective (see p. 4). Miura refers to the above-mentioned passage and quotes another view which makes weakly pronounced *y* and *r* as *shuk-spreksh* (p. 4). The SPV (XIII, 2) however takes *y*, *r*, *i* and *r* as *shuk-spreksh*, but Dr. Miura's translation *shuk-spreksh-kuma* as imperfect content (p. 56 of his SPV, Vol. III).

68 After the Note 18 add the following :

Ushita, urashita and urashita arise from the peculiar conditions of the body called *shukra*, *urashita* and *shukra* respectively. For the definition of these terms see Miura, p. 7.

69 See 20 read 'devanagari'

Add to the Note 17 the following :

Giesse considers the reading *urashita* to be wrong and corrects it to *urashita* (p. 7). The grammatical objection raised by him against the accepted reading is valid but the fact is that the latter may be an original feature of the text which was written in the Chondian style (vide Introduction, 100).

Line 4 from the bottom read 'shukra pasha pasha.'

60 .. 1 for (out of kama) is followed by read:

due to *urashita* (*urashita*) is followed (in prose) by

line 3 for coming read but in other cases the final *o* is

.. 7 after second couplet insert in its present form.

Page 50 Line 12 after the fullstop read: See Mitra on the couplet 25 (p. 10).

Line 6 from the bottom, after the fullstop add

Mitra has very intelligently ascertained the correct reading (see p. 11, ll. 18-19). Tāphtā too has correctly taken *chraśhāpāra* as the correct reading but his interpretation of the passage is misleading (p. 11, ll. 1-2).

64 Line 12 read *virya* *lopanā*.

.. 31 add after the fullstop the following:

Mitra shows that the correct word mentioned in this couplet relates to half *a* and half *a* 0 *a*, short *a* and short *o* and refers to Patañjali's *Mahābhāṣya* (pp. 12-13).

Line 8 in the footnote read *i* and *a* respectively.

65 .. 45 add See Tark. Pr., ll. 12, 14; R. L. Turner in *Aśvath Muckerya Silver Jubilee Volume*, III, p. 237, *Tark. Bloch, K. Indu-Surya*, p. 52.

Last line, add the following:

As I have commented on the Sk. revision (p. 10) he has a difficulty about the interpretation of the passage and involves the authority of the *Śākhāsmṛiti* but such a difficulty does not arise when we read *apāśhāpāra*, etc., between the two hemistichs of Sk. 22.

66 Line 14 after '*virya*' add

see Mangal Das Shastri, *Syāra Pāśhāpāra*, Vol. III, pp. 124-25, Note on l. 61.

Line 4 from the bottom omit T. Pr.

.. 8 from the bottom, add the following:

See also Mangal Das Shastri, *op. cit.*, pp. 143-44 (Notes on p. 22).

67 Line 4 after the fullstop add:

But in this matter Woodcock follows Whitney: see 'A Vedic Grammar for Students,' § 167. 264, 26.

Page 55 but has add the following :

The *Akha-ras* used in modern Indian music was probably invented after the Gupta period, but this should not bring down the date of the above passage. For *Akha-ras* contained in this passage was in all likelihood a very primitive instrument like any modern shakti or one-stringed veena quite different from its later development the modern *veena*. It may readily speak for its great age.

- 60 line 13 read 'dva' opposed' and 'pāṇasthira' '
 .. 20 for *dhva* .. do
 .. 22 .. 'dvaṣṭakṣaya'

70 2 after the fullstop add the following :

From what *Māra* says we understand that joining (clipping) of letters means separating them and *dhva* (or differentiating) is de-separation of them. (सहितसहित-
 ध्वानि सही सुहा सहीति न सहात् सहात्वा सति सहापिहत् सहापि
 न। न न सहीतिध्वानि सहापिहत् सहात्वा सहीति
 (p. 15). "

- has 4 from the bottom read 'sat'ly' and 'sagthi'
 .. 5 from the bottom .. *Māra*.

71 .. 14 add the following

Māra read *anava* *blava*. But this is grammatically wrong. Hence we tentatively read *anava*. *Māra* explains this as an *ava* *vaṣṭi* (p. 17).

has 4 from the bottom, add the following

Tripathi explains *ghata* as 'procured with more break which longious short vowels' (p. 17).

- 72 line 13 read *rustace*,
 .. 24 add the following

Tripathi explains 'akṣita-pāṇasthira' as one reading from a book written by oneself and *akṣapaṇa* as 'one

who has not provided restriction' (p. 18). So does Sarashī (p. 16) and besides this he considers the couplet No. 23 to be spurious (see. *inf.*).

Line 2 from the bottom read the place of.

Page 74 Line 6 for *z*, *y* and *a* read *z*, *y*, *a* and *h*.

.. 12 *Isat* ; (semicolon) after *ness* and , (comma) after *r*.

74 Line 5 from the bottom read the following :

rephawapahit' wāfir, etc.

Line 7 from the bottom read always as an unvocalised word.

Lines 6-8 read 'He seems to have... of the Amogh-mandala Śūtra.'

74 Line 9 read 'Pāpam par īśadān'

76 Line 14, add the following :

Sarashī considers the couplet No. 44 to be spurious (p. 18).

77 Line 5 ff cancel the Note 67c and read the following :

This passage with a slight variation occurs in a late work named the *Śaṅkṣipta S.* by one Ananta (see *ibid.*, p. 263. *Tiṣṭhā*, p. 18).

78 Line 6 for the Pā. read some MSS. of the Pā.

.. 6 after the fullstop read :

The original Pā. probably did not contain this (see p. 52, line 6).

79 12, add the following :

Shāra considers couplets 54 and 55 to be spurious (p. 27) and so does Sarashī (p. 21).
